MALONEY'S NURSERY BOOK 1931

MALONEY BROS. NURSERY CO.
• DANVILLE • NEW YORK •

A Garden is to the Home What Clothes are to the Family

"I'VE owned three homes," a well-known magazine writer said to us recently, "and in each case after living in it for two to five years, I sold the property at a profit. That was because my homes were always the most attractively dressed in the block. I dressed them in plants."

You probably don't plan to sell your home; you expect to live in it. All the more reason for dressing it up. Isn't your own pleasure worth considering? How about the pride of coming home to your attractively planted grounds.

Perhaps your home itself is beautiful in its lines, attractive in design; what could set it off better, then, than a front yard

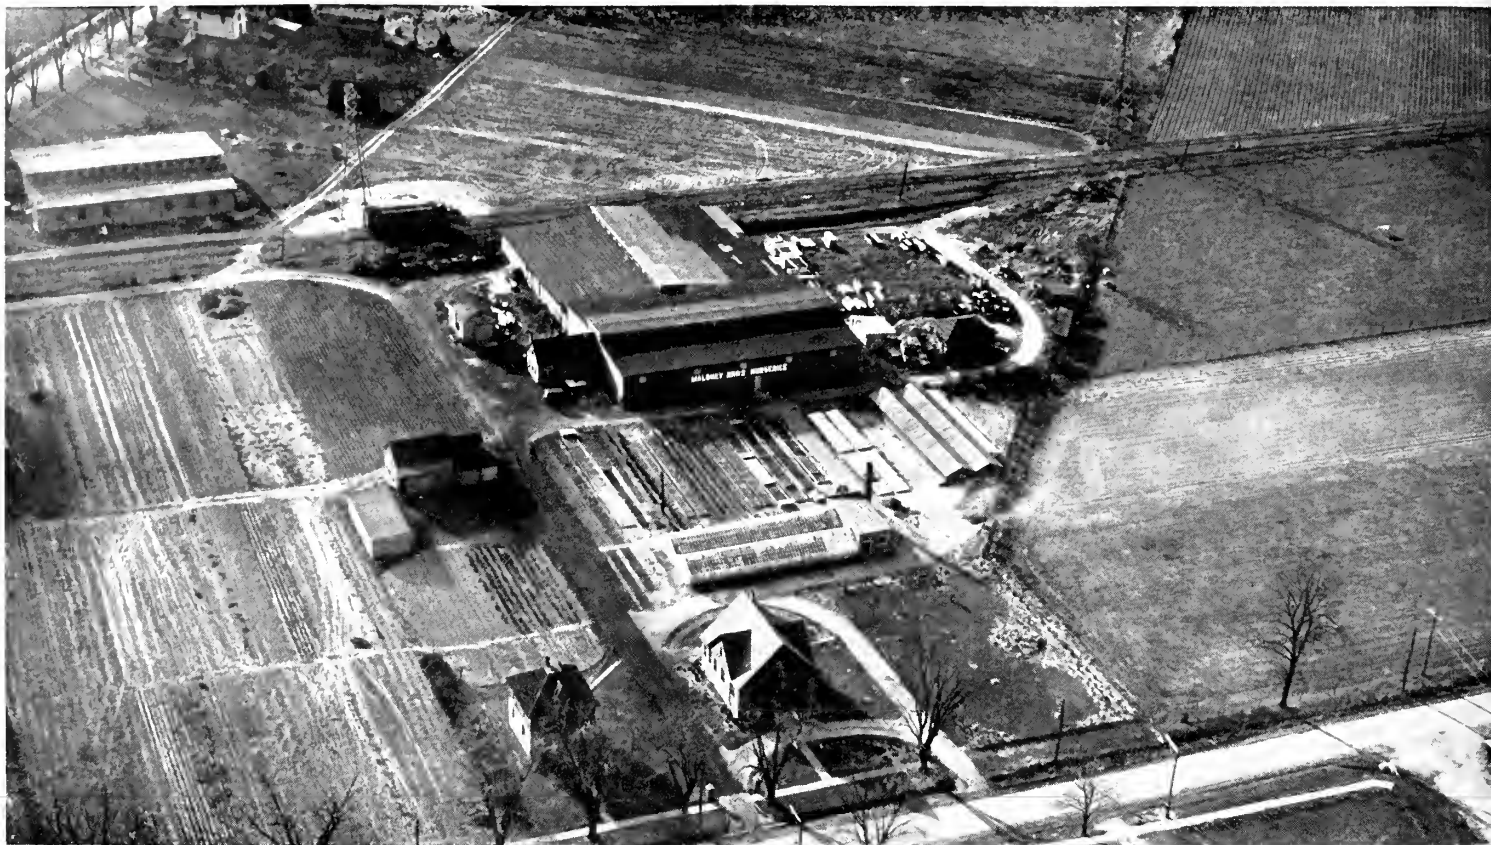

planted in harmony with its architecture? Even a diamond needs a setting to show it at its best. And if your home is modest, how can you give it distinction and richness better than by planting a few well-placed shrubs and roses?

When people pass your home do they point to it and ask, "Whose place is that?" Or does it look to them like every other house in the block? Yes, Mr. Home Owner, the difference is often just a few dollars invested in planting. And with the big reductions on Maloney's fine quality plants, \$10 goes farther this year than it has in the past decade. Now is certainly the time to buy Maloney stock.

**MALONEY BROTHERS
NURSERY COMPANY, INC.**

MALONEY QUALITY

Famous Since 1884, Now at Sharply Reduced Prices

YES, 47 years ago Maloney Brothers Nurseries started business, with one idea in view. In those days buying plants was attended with some risk. Everybody, almost, was selling on price. Quality was disregarded. Sometimes you planted what you had bought as a red rose and when it bloomed pindling little yellow buds—or maybe didn't bloom at all.

Maloney's believed that system to be all wrong. They argued that there must be some people who wanted quality—people who would be willing to pay 10 cents or 15 cents more for a rose bush, for instance, *if they could be sure that it would be what they ordered in type, strength, quality.*

Their first year proved them to be right. Ever since then the Maloney business has grown. Not once in all those 47 years has even one plant been shipped by Maloney's that was not believed to be exactly as represented. To make sure against error every Maloney plant is guaranteed. Ever since 1884 Maloney has meant **DEPENDABLE QUALITY.**

Then, because Quality always succeeds, the Maloney business grew so large that an extra charge was no longer necessary. You could now buy Maloney Guaranteed First Quality Stock for as little as ordinarily good stock would cost. The business of course, grew even larger then. Within a few more years Maloney's were actually selling Guaranteed First Quality Stock for **LESS** than many houses were charging for ordinary stock.

No wonder that thousands of people would buy from Maloney's only. Why, even exclusive fruit growers, who make their entire income from the yield of their orchards, come to Maloney's. They have found that Maloney Guaranteed First Quality Stock is so

superior that they buy thousands of trees at one time—and always with profit to themselves.

Maloney's Prices Reduced Again

And now once more Maloney prices are reduced, and the lowered prices are in effect on every item listed in this Catalog.

This has been no secret in the nursery trade. Those who studied the situation could see it coming. And, as you would expect, there has been a wide-spread attempt to meet Maloney prices. In some cases Maloney's offers have been met—as to prices, **BUT NOT AS TO QUALITY.**

No, Maloney Guaranteed First Quality Stock is still the finest that can be grown—sturdy, strong, vigorous upland stock, with fine long-fibred roots and full of surging life. Such stock matures faster, yields quicker, produces more lavishly, gives larger fruit and more brilliant blossoms. In short, Maloney Guaranteed First Quality Stock is the kind of stock that you have always hoped to own. It took 47 years to produce, but the result stands alone, unrivalled in its superiority. You are cordially invited to visit our nursery. You'll enjoy seeing the fine blocks of hardy fruit and ornamental trees, beautiful shrubs, vines, flowers and other growing things.

We'll be glad to go over your spring planting plans with you and offer suggestions that will do much toward insuring the success of your planting. No obligation—come visit us!

NOTICE: The prices quoted in this Catalog are the lowest in 10 years—the lowest at which we can sell. They include the finest stock that can be grown.

Hints for Successful Planting

PLAN before you plant. First of all keep your plants in masses. As a rule you will find that a mass or group of 3 to 5 plants is just about the right size. We advise not using too many different kinds of plants in one group or mass. In fact, we suggest that each mass consist of 3 to 5 plants of the one variety. You can mix red and white and yellow roses in one group if you like but at least be sure that they are all roses. And many people find it more attractive, for example, to have 4 of the bushes bearing red roses and the fifth bush bearing white or yellow for a little touch of contrast. This makes a much better effect than if you scatter your plants haphazard over the entire lawn.

Secondly, avoid straight lines. A curved walk is always better looking than a straight one. If you want to leave a path through your lawn let it be a curved path. Even when planting next to straight lines, as along the foundation line of the house, you can usually let a semi-circle or some other curved line of plants extend beyond the others, to break the stiff straight effect.

Thirdly, leave some open spaces in your lawn. Velvety stretches of green grass look better when bordered by flowers, and flowers look better in contrast with the flat green lawn.

A good idea is to make a little sketch of your yard on a piece of paper. Then with your pencil indicate where you are going to place your plants. This method saves time, as it is much easier to erase a pencil mark than it is to dig up and reset a plant.

When planting, dig the holes deep and wide enough so that the roots can spread out to their natural position. Set them into the earth about one inch deeper than they were in the nursery. (Practically every plant bears on its stem earth marks indicating how deep it penetrated the soil in the nursery row.)

Having set the plant in the hole, pack the earth solidly around it and fill the hole about three-quarters full. Then apply a good commercial fertilizer according to directions given by the manufacturer; then fill the hole with earth, packing the earth down firmly. Finally, give the new plant a generous watering.

Remember that your new plants are tender, and if you want to give them every possible encouragement it is well to loosen all the ground well with a spade or fork before digging the planting holes. This loosening of the earth gives the growing young rootlets plenty of crevices into which they can penetrate.

CARE AFTER PLANTING

For the same reason it is well to work the ground frequently, keeping it loose and porous during June, July and August. This permits air to circulate through the broken up ground and the result to the plant is very beneficial. Give your plants plenty of water during dry periods. While these directions apply principally to the first year after planting, they encourage growth if followed in subsequent years.

PRUNE BEFORE PLANTING

For best results you should prune both the root and the tops before planting. This enables the root system to make a new growth and the plant takes a better hold in its new location.

Shrubs—trim off $\frac{1}{2}$ of the top and $\frac{1}{4}$ of the ends of the roots.

Roses—trim tops back to three eyes on each stem and trim off $\frac{1}{4}$ of root ends.

Privet—trim tops to within 8 inches of ground and prune off $\frac{1}{4}$ of the root ends. This will give you a much more dense and thrifty hedge.

Ornamental and Shade Trees—trim off $\frac{1}{4}$ of the top and $\frac{1}{4}$ of root.

For pruning and planting instructions of Fruit Trees see page 27 and for Evergreens see pages 24-26

MALONEY RADIO SERVICE WILL CONTINUE

For several seasons Maloney Brothers have broadcast advice on planting problems. Thousands of letters have been received from friends all over the United States expressing their appreciation of this helpful information. Maloney broadcasts will continue during the Spring of 1931 well into the beginning of the planting season.

These radio talks will give helpful suggestions on what to plant, how to plant it, and how to care for it after it is planted in order to secure the biggest yield. These radio talks will be given over stations WHAM (Rochester) and WGY (Schenectady). Listen for them every MONDAY evening beginning Monday, January 19, and up to and including Monday, April 6. Also February 23 and March 2 from WBEN (Buffalo), WBZ (Springfield), WTAM (Cleveland), KYW (Chicago).

10% Discount for Cash with Order, if mailed on or before March 25th, 1931;
5% Discount after that date.

Landscape Service

OWING to the many requests, asking what varieties of trees, shrubs, roses, etc., to plant for best effects and where to plant them, we maintain a Landscape Service Department for the convenience of our customers. This service applies just as well to the small yard as to the great estate of many acres.

EXPERIENCED ARCHITECTS

In this department we are employing landscape architects, who are familiar with the habits of varieties, who know the positions required for the different kinds, and who have an extensive knowledge of trees and plants. We are forced to make a small charge for their service, but because they usually recommend fewer plants than you yourself would select, they reduce your total expenditure while giving you handsomer grounds. When it is merely a question of advice on your planting problems no charge is made as this is a service we are anxious to render to insure your satisfaction.

MONEY-SAVING SERVICE

You really save money by using this service, because you thereby get the best effects with the smallest number of plants, and no waste. One gorgeous plant, flanked by less expensive ones, is often more effective than a greater number of pieces which might total a larger cost. Again, on large grounds, by having a plan you can divide the expenditure by planting part of the grounds each year, building to a beautiful finished work of art.

COST OF PLAN

No actual charge for Landscape plans. Kindly send the information requested and our Landscape Department will draw you a complete plan showing what varieties to use and where to plant them. For this plan we will make a charge of \$4.00. Then if your order amounts to \$35.00 or more you may deduct the \$4.00 cost of plan when remitting. Cost of plan not deductible for order under \$35.00.

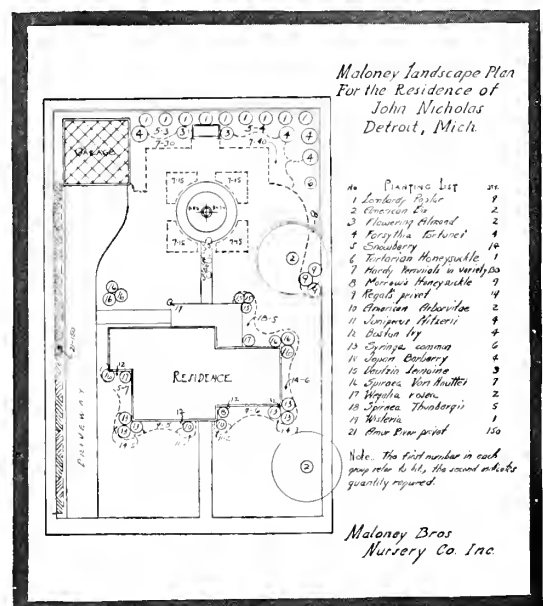

NECESSARY INFORMATION

The accuracy of our plan depends upon the information you give us, so be complete and exact.

Dimensions of Property, Dimensions of Buildings (show ground floor plan on sketch and give complete dimensions)—Distance of Buildings from Property Lines (locate in respect to Front, Back and Side Lines) Cost of House, Style of Architecture—locate all entrances, locate walk and drives and give width; locate porch and

basement windows; (indicate Coal and Laundry Windows); show number of steps; locate existing trees and shrubs of any description; indicate any terraces or sloping ground; give directions of the compass; indicate objectionable features to be screened; indicate views to be retained; send any available photographs. Do you want a vegetable and fruit garden; do you want a Hardy Flower Garden? You don't have to make an architect's drawing to exact scale. Just a rough sketch will do, but be sure it contains all the information requested above. We will supply a complete scale drawing, as indicated in the lower right hand corner of this page. *We strongly recommend that you use this service.*

Write or phone us. Consultation and personal supervision by our landscape architects can be arranged for large estates, parks, schools, cemeteries, sub-divisions and public buildings anywhere.

Maloney Bros. Nursery Co., Inc.

Three New Introductions

Beauty Bush

MALONEY'S strive to offer their patrons the latest and most popular introductions for the beautification of the home grounds. The varieties illustrated on this page are the outstanding attractions for 1931. Every lover of roses and shrubs should include these three varieties in their planting at our new low prices:

President Hoover, an outstanding novelty

The new Talisman; no illustration can do this new rose justice.

Beauty Bush—The name is most fitting for it truly is the most beautiful of all shrubs.

President Herbert Hoover

"President Hoover" is a glorious rose, wonderfully free in the easy manner in which it grows and charming in its color arrangement, which is a splendid combination of cerise, pink, flame, scarlet and yellow, and this combination gives the most dazzling color effect ever seen in any rose. It is one of the most cheerful roses imaginable. The flower is large and the bud beautifully pointed. The petals are broad and thick, retaining this characteristic days after the flowers are open. It is a splendid keeper, much on the order of "Pernet" in this respect.

The exquisite fragrance of this rose is one of its strongest points, and after twenty-five years of introducing new roses, we have never had a rose to compare with it in fragrance. It makes 3 feet breaks, without pinching and everyone will be delighted with its growing habits.

It is a selection from over forty thousand seedlings originated by Mr. Coddington and was awarded the Gold Medal at the International Flower Show in New York, 1929, as the Novelty Rose of the year, also Gold Medal at the New Jersey Show in November.

The clean, handsome foliage is an added attraction to this beautiful rose. Strong two year bushes.....\$1.75 each

President Herbert Hoover

Talisman. A NEW HYBRID TEA ROSE

The most vividly colored rose ever introduced. No illustration can do it justice. Beautiful combination shadings of gold, apricot, deep pink and old rose. Unlike most roses, the colors deepen as the rose opens. It created a sensation when first introduced and its popularity is growing by leaps and bounds. Awarded Gold Medals by American Rose Society, also at the International Flower Show at New York, and the President Coolidge Horticultural Gold Medal. It has fine green foliage and is a free bloomer. Be sure to include this gorgeous new rose in your planting.

Strong, two year bushes.....\$1.50 each

Beauty Bush (Kolkwitzia Amabilis)

An exceedingly handsome ornamental shrub which has come to us from the wilderness of China and Central Asia. The foliage and habit are attractive even when the bush is out of flower, and it is perfectly hardy as far north as Montreal.

It grows 6 to 9 feet high when matured, erect and twiggy, producing long, arching branches covered in spring with clusters of small, tubular flowers of the honeysuckle type, borne in such profusion that the bush is one cloud of delicate pink.

Beauty Bush has all the merits of a perfect shrub: hardiness, year around beauty in foliage and habit, and an amazing profusion of flowers of beautiful color.

18 to 24 inches.....\$1.25 each

Attractive Planting Plans

THESE suggested planting plans are easily followed and where a planting is wanted around the foundation or a border these plans will prove most satisfactory; moreover, the varieties recommended have been selected after very careful study by our landscape architect and can be depended upon to produce most wonderful effect in both color of flower and foliage. Space shrubs two feet from foundation, then three feet apart. A few ornamental trees and evergreens on lawn gives added charm.

Rock Gardening . . . a Popular Vogue this Season

HOW TO BUILD A ROCK GARDEN

ROCK gardening has become the new vogue. It offers so many possibilities for individual treatment that it is really no wonder that every one is eager to have the distinction of a rockery in their own garden. On even the smallest lot there is space to build a bit of interesting rock work, for the compactness of a rock garden is one of its greatest charms.

A terrace may be turned into a pleasing picture. On a level building site a mound of earth, edged and capped with rocks makes an interesting rock garden.

The best rocks to use are those between the round or boulder type. Use rocks of different sizes, striving always for a natural effect. Too many small stones make the rock garden look artificial.

Soil—good productive soil, such as is used for the rose garden.

Lay the lower rocks first, placing them so there is more plant surface than rock in the finished effect. Plants do not get food out of rock but from the soil and these soil pockets are essential.

As each rock is laid, ram the soil back, around and beneath it; use no cement. Four factors in the success of rock work are: (1) Place each stone so it is anchored firmly. Stones above help to hold those below. (2) Slope horizontal crevices downward into bank. (3) Rocks uptilted let rain run down into crevice; tilt back 10 to 45 degrees or more. (4) In walls, set each higher rock back of the lower giving the face of the wall a back slope; thus giving plants water, air, light and room.

Low-growing shrubs and evergreens are particularly effective in the rock garden. Taller growers are frequently used as borders or in the background, to create the necessary atmosphere of informality which the rockery demands.

Now comes the most interesting part, the flowering plants.

After studying and considering rockery plants we have selected and are offering on this page varieties when planted promiscuously will produce the most charming effect.

Choice Rock Garden Plants

PRICE, TWO YEAR STRONG PLANTS, 3 FOR 60c;
10 FOR \$1.75 (except as noted)

Alyssum Saxatile Compactum (Goldentuft)—Broad masses of bright yellow flowers in early spring. 1 foot.

Arabis Alpina (Alpine Rock Cress)—One of the best rock garden plants, producing a mat of white flowers early in the season, and providing a soft, grayish green carpet the rest of the season. 9 inches.

Armeria Lauchiana (Sea Pink)—Attractive dwarf plants that will succeed in any soil, forming evergreen tufts of bright green foliage, from which innumerable flowers appear in dense heads, on stiff, wiry stems, from 9 to 12 inches high. Bright rosy red. May-June.

Aubrietia Bouganvillei (False Rock Cress)—Small showy light violet flowers which almost hide the silvery foliage. 4 in. 3 for 75 cents; 10 for \$2.25

Heuchera Sanguinea (Coralbells)—Flowers bright crimson, very free flowering. 12-18 inches. June to September.

Iberis Sempervirens (Evergreen Candytuft)—Of loose, spreading habit and distinctive narrow evergreen foliage. Flowers pure white, completely covering the plant. 1 foot. May.

Myosotis Alpestris (Mountain Forget-me-not)—Clusters of azure blue flowers and dark, glossy green leaves. 8 inches.

Myosotis Palustris (Marsh Forget-me-not)—Large, rich blue flowers with yellow eye.

Papaver Nudicaule Alpinum (Iceland Poppy)—The plant is of neat habit, forming a tuft of bright green fern-like foliage, from which springs throughout the entire season, a profusion of slender, leafless stems 1 foot high, each graced with charming cup-shaped flowers in orange, yellow, white mixed, and often fringed. 3 for 75 cents; 10 for \$2.25

Phlox Subulata—A very dwarf, creeping Phlox covered with small flowers in the early spring and a bright green mat of foliage all year. Rose and white.

Primula Auricula Alpina (Hardy Primrose)—The growth is very attractive, forming rosettes of thick leaves, sometimes farinose or mealy. The flower stalks rise to a height of six or eight inches, bearing blooms of various colors; exceedingly fragrant. 3 for 75 cents; 10 for \$2.25

Primula Cashmeriana (Hardy Primrose)—Large, globular heads of a pleasing purplish blue shade; prefers a moist, shaded or sunny location. 3 for 75 cents; 10 for \$2.25

Veronica Rupestris Nana (Speedwell)—Prostrate and creeping, forming a dark green carpet of shiny foliage which is covered with deep Gentian blue flowers in late April and early May. 3 for 75 cents; 10 for \$2.25

Hardy Water Lilies

THERE are no flowers that are easier to grow than water lilies, and none that equal them in range of color and delicacy of perfume.

To grow water lilies successfully in a pool, there are three requisites—quiet water, open sunshine, and rich soil.

The simplest way to plant in a concrete pool is to provide boxes about two feet square by one foot deep, with rich soil. Place one water lily root in each box, covering up to the crown of the plant. Then cover with an inch of sand or gravel to prevent discoloration of the water, and also to prevent the fish digging around the roots.

The water should be from nine to twelve inches over the crown of the plants.

N. Marliacea Chromatella—A free and vigorous grower with flowers 4 to 6 inches across, of bright canary yellow. One of the best. \$2.00 each

N. Marliacea Albida—Flowers white, large and quite fragrant. A strong grower and a continuous bloomer. \$2.00 each

N. Odorata W. B. Shaw—Flowers large, of a rich rose pink color and very fragrant. A strong grower and continuous bloomer. \$1.25 each

N. O'Marana (Night Blooming)—Flowers of the largest size; petals of a reddish pink with nearly white stripes up the center. A vigorous grower and a free-flowering variety. \$1.50 each

N. Kewensis (Night Blooming)—One of our most attractive night lilies. Flowers exquisite shade of pink, borne in profusion. \$1.50 each

Water Hyacinth—This is a floating plant with glossy green leaves and trusses of the most lovely orchid-like flowers of light lavender. Most desirable. .25 cents each

Flowering Shrubs

A small investment in shrubs will add beauty and charm to your home; moreover, will increase its value materially.

PRICE OF ALL TWO YEAR, NO. 1
HARDY SHRUBS, 2½ TO 3½ FEET

(Except where otherwise noted.)

1931 Price 35c each; 10 for \$3.00

1930 Price 50c each; 10 for 4.50

Shrubs can be sent by parcel post, postpaid for 5c each extra.

OUR list of shrubs includes the most desirable, deciduous, blooming and berry-bearing varieties.

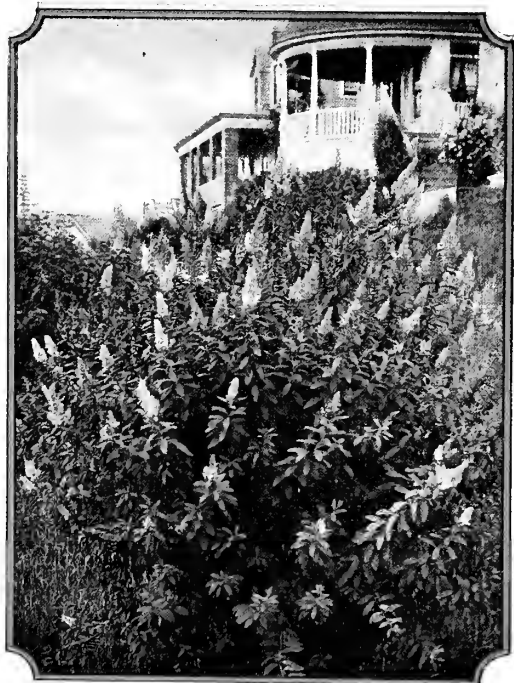

For your convenience and to enable you to get the best effect from your planting, we have indicated the kind of plants best suited for various locations. They naturally cover a wide range as to size, from very low growing plants to those that are tall enough for screens. In color of blossom, character of growth, adaptability to soil, you will find something suited for every location. They will put the finishing touches to your home grounds.

Lilac

Shrubs for Foundation Plantings, and How to Plant Them as to Size:

Dwarf Growing—Barberry, Deutzia Gracilis, Deutzia Lemoinei, Kerria Japonica, Spiraea Anthony Waterer, Spiraea Thunbergi.

Medium to Tall Growing Varieties—Almond, Althea, Butterfly Bush, Calycanthus, Coralberry; Deutzias: Crenata, Pride of Rochester; Golden Elder, Hydrangea A. G., Mock Orange, Japan Quince, Pearl Bush, Purple Fringe; Spiraeas: Prunifolia, Billiardi, Callosa Rosea, Douglassi, Van Houttei; Syringas: Common, Golden, Sweet Pepper Bush, Tamarix; Weigelas: Candida, Eva Rathke, Floribunda, Rosea.

Spiraea Billiardi

Weigela Rosea

Tall Growing Varieties for Corners and Borders—Dogwood, High Bush Cranberry, Honeysuckle, Snowball, Lilacs.

For Berries in Winter

Barberry Thunbergi, Red Leaf Barberry, Coralberry, High Bush Cranberry, Snowberry.

For Shady Locations

Barberry, Coralberry, Deutzias, Dogwoods, Forsythia, Honeysuckle, Hydrangea A. G. A., Mock Orange, Snowball, Snowberry, Spiraea Van Houttei, Witch Hazel.

Abelia Grandiflora—

An attractive dwarf shrub, suitable for a sunny, sheltered position anywhere the winters are not extreme; with small shiny foliage which is almost evergreen. The flowers are small, but very pretty and numerous, in loose terminal panicles; color, white flushed with pink. This shrub is rarely without some bloom from June into November. 18 to 24 in.

70 cents each

Spiraea Anthony Waterer

Hydrangea P. G.

geous throughout the summer and in the fall its foliage changes to vivid orange, scarlet and red shades. Scarlet berries remain on the plant the entire winter. All that is required to develop its brilliant coloring at all seasons is that it be planted in full exposure to the sun. Grows 3 feet.

18 to 24 in. 65 cents each; 5 for \$3.00

Barberry Thunbergi (Berberis Thunbergi)—Dwarf habit, very graceful and its foliage turns to a beautiful red in the fall. Red berries remaining during winter. Grows 3 feet.

25 cents each; 10 for \$2.00

Beauty Bush—See page 5.

Butterfly Bush (Buddleia)—Attracts butterflies in large numbers. Produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers. Blossoms from early summer till frost. Grows 3-4 feet.

Calycanthus—Foliage rich; flowers are of chocolate color, having a peculiarly agreeable odor. August. Grows 5 feet. 50 cents each

Coralberry, Symphoricarpos Vulgaris (Indian Currant)—Vigorous, quick growing shrub similar to snowberry except fruit is red. Rose colored flowers in June and July. Grows 4-5 feet.

Cornus Mascula—Grows tall; spring flowers bright yellow; the fall fruits scarlet.

2 to 3 ft. 75 cents each

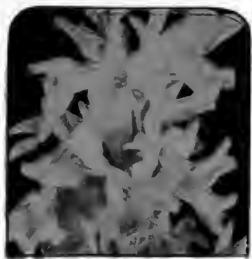

Cotoneaster Horizontalis—A dwarf shrub with densely spreading horizontal branches almost prostrate. On account of its habit, is much appreciated in rockeries and the front of borders, to display its crimson leaves and scarlet fruits, deep into winter. B. and B. 18 to 24 in. \$2.00 each

Deutzia, Crenata (Double Flowering)—In May is fairly covered with very showy double white flowers, edge slightly tinged with rose. 5-6 feet.

Deutzia, Gracilis—Pure white flowers in June. Grows 2 feet.

Deutzia, Lemoinei—Flowers are large, pure white and produce freely. May. Grows 3 feet.

Deutzia, Pride of Rochester—Blossoms in May. Double. white. Grows 5-6 feet.

Forsythia

Deep yellow flowers in great profusion in April. Grows 6-8 feet.

Dogwood (Red)—Very conspicuous in winter when branches turn to blood red. Grows 6-8 feet.

Dogwood, White (Cornus Alba)—Large white flowers in spring, before the leaves appear. Stem and branches turn to bright red in winter. Grows 6-8 feet.

Dogwood, Yellow (Cornus Lutea)—A striking yellow branched form. Satisfactory for contrast. Grows 6-8 feet.

Forsythia Fortunei (Golden Bells)—

Philadelphus—Mock Orange or Syringa

- Coronarius Flore-Pleno** (Garland Syringa)—Flowers pure white; highly scented. Double. Grows 6-8 feet.
- Foliis Aureus** (Golden Syringa)—Yellow foliage, white flowers. Very sweet scented. Grows 3-5 feet.

Honeysuckle, Pink (Grandiflora Rosea)—Bright pink flowers. Covered in summer and autumn with orange berries. May. Grows 8-10 feet.

Honeysuckle, Red (Tatarica rubra)—Light red flowers. Covered in summer and autumn with scarlet berries. May. Grows 8-10 feet.

Hydrangea, Arborescens Grandiflora Alba (Hills of Snow)—The blooms are of the very largest size, of pure snow-white color in July and August. 4-5 feet at maturity.

Hydrangea, P. G. (Tree Form)—When in full bloom are very attractive. 3-4 feet. \$1.00 each

Hydrangea Paniculata Grandiflora—Absolutely hardy; thrives in all soil; grows rapidly and blossoms profusely. The flowers are pure white, afterward changing to pink, and are borne in large pyramidal trusses a foot long and six to eight inches in diameter. Begins to bloom early in August, and continues to bloom for several weeks. 6-7 feet at maturity.

Kerria Japonica—A medium dwarf shrub, beautiful globe-shaped flowers of bright orange. July. Grows 3-4 feet.

50 cents each

Lilac, Purple (Syringa Vulgaris)—An old favorite; purple flowers. May. 6-8 feet.

Lilac, White (Syringa Vulgaris alba)—Well-known favorite. May. 6-8 feet.50 cents each

Virginal—Very large, double white flowers in clusters of five to seven; blooms in June. 5-7 feet.

Pearl Bush—Buds like pearls strung on slender threads and open up to fragrant clusters of pure white, starry flowers. Grows 6 to 10 feet high.

Quince, Japan (Cydonia Japonica)—Dark green foliage, and showy, deep scarlet flowers. May. Grows 5-6 feet.

Snowball, Common—Makes a large bush. Bears balls of pure white flowers in June. Grows 8-10 feet.

Snowball, Japan—A mass of white in June. Grows 6-7 feet. 60 cents each; 10 for \$5.50

Snowberry—Very ornamental, hardy shrub. Small, pink flowers followed by large, waxy white berries, which remain during winter. June and July. Grows 4-5 feet.

Spiraea Anthony Waterer—A dwarf variety of great beauty. Its broad flat heads of red flowers continue in profusion all summer. Grows 3 feet.

Spiraea Billiardi—During July every branch and twig is tipped with a spike of beautiful blood-red flowers 4 to 6 inches in length. 4-5 feet at maturity.

Spiraea Callosa Rosea—Has large panicles rose-colored flowers. Blooms nearly all summer. Grows 4-6 feet.

Spiraea Douglasi—Has spikes of deep rose-colored flowers in July and August. Grows 4-6 feet.

Spiraea Korean (Spiraea Trichocarpa)—This splendid new shrub is enthusiastically acclaimed the finest spiraea yet discovered. It is strong growing, attaining a height when matured of 4 to 6 feet tall, forming a large, globe-shaped bush which is covered with large rounded clusters of snowy white flowers marked with darker eyes. Blooms about two weeks later than the popular Spiraea Van Houttei. It is perfectly hardy as far north as Montreal. It retains its beautiful glossy green foliage late into the autumn. Strong, 2-year-old, field-grown plants. \$1.25 each; 3 for \$3.25

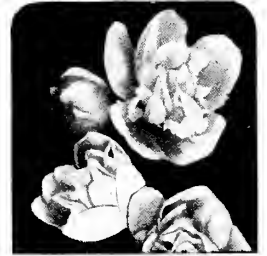

Spiraea Thunbergi—Feathery foliage, which is a peculiar but pleasing shade of yellowish green, changes in autumn to bright red and orange. Grows 3-5 feet.

Spiraea Van Houttei—The best spiraea. White blossoms in May and June. Grows 5-7 feet.30 cents each; 10 for \$2.50

Stephenandra Flexuosa—Branches angular, zigzagged, deep lobed foliage, colors to purplish red; and paniced racemes of white flowers in June. Grows 3-4 feet.

Sweet Pepper Bush (Clethra Alnifolia)—Very hardy; blooms every season without fail; cold never harms it; flowers white, spikes three to six inches long. Grows 4-5 feet.60 cents each

Tamarix, Africana—The pink flowers, filmy foliage and gracefulness make them one of the most desirable shrubs for background or interplanting. Grows in poor, dry soil. Blooms early. Grows 4-5 feet.

Hydrangea Arborescens

Viburnum Carlesi—A valuable recent introduction from Korea, producing its delicate, spice-scented flowers in May and June. The buds, before expanding, are an attractive pink, developing into Bouvardia-like umbels of pure white. Flowers preserve their perfect form and purity of color an unusually long time, and are exquisitely scented. The bush is rounded, slow growing to four feet; with broadly oval leaves, dull green above, glaucous beneath and hairy on both sides, autumn painting them luxuriantly.

15 to 18 in. \$2.25 each

Weigela, Candida (Diervilla Candida)—The flowers are of the purest white, blooming in June, and all summer. Grows 5-7 feet.

Weigela, Eva Rathke (Diervilla Eva Rathke)—Showy, bright red flowers borne freely during the summer. Grows 5-7 feet.

Weigela, Floribunda (Diervilla Floribunda)—Flowers dark crimson, with white stamens somewhat like Fuchsia flowers. Blooms in the spring and in the fall. Grows 5-7 feet.

Snowberry

Weigela, Rosea (Diervilla Rosea)—One of the most charming shrubs in cultivation; the flowers are large and of deep rosy color, and are borne in great profusion, July. Grows 5-7 ft.

Weigela, Variegated Leaved—One of the best dwarf shrubs. Silvery variegated leaves, flowers nearly white. Grows 4-5 feet.

Winged Burning Bush (Euonymus alatus)—Spreading in growth, with peculiar corky bark. Has ornamental scarlet berries. Foliage turns a beautiful crimson in autumn. Ultimate height 6 feet. 75 cents each

Early Spring Pruning

March and early April is the best time to prune shrubs for this type of pruning must be done when plants are dormant.

Shrubs which flower in May and June should be pruned after flowering, and dead or diseased wood may be removed at any time, but with most March and April is the most favorable pruning time.

Sharp tools are important, for those that chew and tear instead of cutting cause more grief than no pruning at all. In cutting back branches be careful to cut close to a bud. Avoid leaving stumps even half an inch long.

And unless you are shaping a shrub to fit into a deliberately formal effect, never cut back shrubbery with a straight edge as though it were a hedge, but study each shrub and try to help it realize its natural habit of growth.

Exceptions to the rule that shrubs should be pruned at the bottom and not at the top are found in the case of lilacs and hydrangeas. Lilacs may be thinned out at the base like other shrubs, but in addition their blossoming will be improved if directly after their blossoms have faded, all the dead sprays are cut off. Hydrangeas should be pruned at the bottom, though perhaps not so severely as other shrubs; but in addition it is necessary to cut off the tips of the stems severely each spring, about one-half, if one wishes large blossoms.

OUTDOOR LIVING ROOM

The outdoor living room has arrived! Its appealing beauty, charm and comfort have won the nation. Everywhere it is supplanting the old unsightly rear yard—and everywhere the home either has an outdoor living room or one is now being planned for this summer.

TIME TO MAKE THE START

If you would have an outdoor living room this summer, you must start now! You will thoroughly enjoy the planning and planting—and you will be amazed that so much beauty, pleasure and satisfaction can be had for so small a cost.

A few trees, shrubs and evergreens to give privacy, shade and to shut out undesirable views—a soft, rich carpet of velvety grass—and some hardy flowers to give color and fragrance—that's all you need for the modern outdoor living room which is everywhere replacing unsightly rear yards.

Deutzia Crenata

Roses

THE loveliest of all flowers is the rose, and the sweetest of all perfume is its fragrance.

What could be more delightful than returning from your garden with a bouquet of roses?

Our roses are fine, healthy, strong, vigorous two year bushes, field grown, ready to bloom profusely the first summer. Our list comprises the best varieties that the world offers. Roses are easy to grow when suggestions for rose culture are followed.

Roses by Parcel Post 5c per bush extra

HYBRID TEA ROSES

Betty Uprichard—Outer petals glowing carmine, the inner, soft salmon pink to carmine. The buds are copper red opening to fairly full flowers with good fragrance.

Dame Edith Helen—One of the largest and most perfectly shaped pink roses known. Blooms abundantly, with long, strong stems, and the flowers resemble a perfectly shaped, bright pink Francis Scott Key. It has attracted abundant praise and unstinted admiration everywhere. The most perfumed of all pink roses.

Chas. K. Douglas—Scarlet, flushed bright velvety-crimson. Long pointed buds, opening into large, loose, well-formed flowers.

Duchess of Wellington—Intense saffron yellow, outside petals stained crimson, passing to deep coppery saffron yellow as it develops.

Edel—Pure ivory white; a truly superb rose of good form, producing abundance of large flowers.

Etoile de France—Rich velvety crimson with rounded centre of vivid cerise. Strong, free-bloomer.

Etoile de Hollande—Brilliant dark, glistening red. Very fragrant. A practically faultless rose that holds its color into late fall.

General McArthur—Erect, free-growing plants, with good foliage and an abundance of velvety crimson-scarlet bloom.

Mme. Jules Bouche

Souvenir de Georges Pernet

Etoile de France

Mme. Edouard Herriot

General McArthur

Betty Uprichard

Edel

Gruss an Teplitz—Brilliant crimson flowers of medium size, produced in clusters. Probably the most consistent bloomer of all red roses.

President Herbert Hoover—See page 5.

J. L. Mock—The giant pink from Holland. Magnificently formed, deep, double, exquisitely fragrant.

K. A. Victoria—Buds are creamy white, solidly formed, developing into full flowers of the purest white, tinged lemon in the centre.

Killarney Queen—Deep brilliant pink. Extra large flowers, double, well formed. Makes a wonderful cut rose in the bud and lasts well.

Lady Hillingdon—The always-popular, beautiful apricot-yellow Tea Rose with lovely buds and exquisitely formed open blooms produced continuously. Probably the hardiest of all Tea Roses and undoubtedly the best yellow bedding rose.

Laurent Carle—Large, brilliant, velvety carmine blooms of perfect form, intensely fragrant.

Lord Charlemont—Clear crimson, deepening to carmine crimson. A beautiful, even and lasting shade. High centered flowers; fragrant.

Los Angeles—Unsurpassed in beauty of coloring—luminous flame-pink, toned with coral, shaded gold at base of petals.

Madame Butterfly—A beautiful blend of light salmon apricot with gold tinted base. Flowers of large size, perfect shape; good for cutting.

Mme. Edouard Herriot—Brilliant buds of coral red and orange. Fragrant.

Mme. Jules Bouche—Large flower of pure white, with a tinge of blush in the centre. Vigorous grower and profuse bloomer. Fragrant.

Mrs. Aaron Ward—The buds are a rich golden buff, developing into large, well-shaped flowers of Indian yellow, tinged salmon. Dwarf habit, well branched, bushy and a free bloomer.

Padre—Bright scarlet and copper with orange base. Semi-double flowers with moderate fragrance.

Radiance—Rose-pink buds developing into large full glossy pink petals. Fragrant.

Red Radiance—A bright rosy red form of Radiance with the same good habit and blooming qualities.

Rev. F. Page-Roberts—Coppery-orange buds, developing into large, full golden yellow flowers, outer petals suffused with red. For size, color and shape, it surpasses all its shade and produces freely, especially in the fall; fragrant.

Roselandia—Rich golden yellow. This is a sport from Golden Ophelia with the color much deeper and richer and the flower larger and longer in the petal.

Red Radiance

Sensation—Scarlet-crimson of magnificent shade, with blackish shadings. Extremely large and double.

Souvenir de Claudius Pernet—Long, pointed buds; large, full flowers of a most striking, sun-flower yellow, deeper in the centre.

Souv. de Georges Pernet—Glowing carmine pink, ends of petals lighter, the whole flower slightly shaded yellow. Red buds. Flowers are of perfect formation, full pointed and freely produced.

Sunburst—Giant yellow, suffused orange-copper.

Talisman—See page 5.

Templar—Clear bright red. Very full, globular shaped flowers. Very fragrant.

Willowmere—Rich shrimp pink, shaded yellow in the center. Particularly attractive buds.

Hybrid Perpetual Roses

EVERY ONE HAS BLOOMED IN NURSERY ROW

PRICE OF STRONG BUSHES, TWO YEAR, NO. 1,
55c EACH; 10 FOR \$5.00

Hybrid Perpetual Roses are not as free bloomers as the Hybrid Teas, but are completely hardy and of vigorous growth. They bloom tremendously in June and usually sparingly in autumn.

Frau Karl Druschki (Snow Queen)—The finest white Hybrid Perpetual. It is marvelous in its beauty in half opened bud and in the pure white of the full opened bloom.

General Jacqueminot—Brilliant crimson; large and fine. Beautiful in bud and a universal favorite.

George Arends—Clear, tender pink; good bud and perfectly formed flowers.

Harrison's Yellow—Extremely fragrant, profuse in bloom.

J. B. Clark—Intense, deep scarlet, heavily shaded, blackish crimson. Large, full, with immense petals.

Madame Gabriel Luizet—Flowers light silvery-pink, shading paler at petal edges. Bears an abundance of bloom.

Magna Charta—Pink and carmine; very large and full; a profuse bloomer. Fragrant.

Margaret Dickson—A free summer and autumn bloomer. Flowers white with pale flesh center; delightful fragrance.

Paul Neyron—The largest of all. Deep rose color. A free bloomer and vigorous grower.

Prince Camille de Rohan—Very dark velvety crimson, changing to intense maroon.

Ulrich Brunner—Large flowers of light red. The abundant flowers grow on long stems borne by a plant of very vigorous growth.

Suggestions for Rose Culture

Plant roses in good rich soil. Do not trim the roots off too severely, but cut the tops off about six to eight inches above the top of the ground. Pack good rich soil thoroughly around the roots.

Budded roses should be planted two or three inches deeper than are rooted plants. This gets the root stock which is non-blooming down where it will not sucker or sprout.

After planting, a good idea is to place a few shovel fulls of soil over the plant tops to shade them for a week or longer while the roots are getting started. This keeps the tops from shriveling while the main roots are throwing out their little moisture-gathering rootlets. Remove the soil some cloudy day and the roses will grow on nicely.

Winter protection of the tenderer bush roses is usually necessary. Soil mounded up over the plant, the tying of straw or similar protection is advised.

PRICES LOWEST IN TEN YEARS.

Killarney Queen

Rugosa, Hugonis & Moss

Grootendorst (Rugosa)—For group planting to give color contrast throughout season. Everblooming. Colors red and pink.

Rosa Hugonis—A dense rose bush of medium shrub proportions, well adapted to either specimen or mass planting in the foreground of shrub groups. All season its refined acacia-like foliage, through which gleam the red-maroon canes and hairy bristles of new growth—is delightful; but the best show is when May converts its innumerable buds into a shimmering mound of gold. The 2-inch flowers are single, flat to cup shaped with charming stamen tufts at center; set snugly full length of last year's arching canes. Their color is bright and noticeable, ranging in shades of yellow from deep gold to canary.

Moss Rose (Gracilis)—Deep pink, well mossed. Very beautiful. Keeps quite long after cutting. Bush extremely hardy. Will thrive where many roses fail.

Dwarf Polyantha—Baby Roses

PRICE, 55¢ EACH; 10 FOR \$5.00

Chatillon—Wonderful sprays of truly beautiful semi-double flowers which last long in water. The florets average about $1\frac{3}{4}$ inches in diameter, each heart-shaped petal distinctly lobed. The color is a charming silvery crimson fading away to flushed white at the center.

Jeanne d'Arc—Pure white flowers in large clusters: delightfully perfumed.

Mrs. W. H. Cutbush—Soft pink flowers in clusters, like a dwarf, everblooming Dorothy Perkins.

Golden Salmon—The newest Polyantha, and one of the most attractive. The flowers are large, semi-double, thickly clustered, and never missing throughout the entire season. Color a beautiful red-salmon overlaid with a sheen of orange and gold, the light eye daintily conspicuous.

Tree or Standard Roses

FOUR FEET, PRICE \$2.50 EACH

Gruss an Teplitz—Red; **Lady Hillingdon**—Yellow; **Mad. C. Testout**—Pink.

American Pillar

Paul's Scarlet

Climbing Roses

PRICE, TWO YEAR, NO. 1 BUSHES, 40¢ EACH;
5 FOR \$1.75 (except as noted)

American Pillar—The single flowers range from 2 to 3 inches in width arranged in mammoth, evenly rounded clusters. Brilliant carmine-rose, with distinct cream variegation and yellow stamens at center.

Climbing American Beauty—Rich carmine pink, the large, finely shaped flowers being borne singly or in threes. Rambler type.

Climbing Gruss an Teplitz—Vigorous, branching grower bearing continually bright crimson flowers like the bush rose of the same name. 65 cents each

Climbing Lady Hillingdon—Beautiful large flowers of apricot and saffron-yellow. It blooms all the time. 65 cents each

Climbing Mme. Caroline Testout—Climbing form of the well-known Hybrid Tea. Probably the hardiest of the type and very free-blooming. 65 cents each

Crimson Rambler—Vigorous, hardy and extremely prolific. It blooms in clusters of a beautiful crimson color and lasts a long time.

Dorothy Perkins—Beautiful shell-pink. Flowers double, large, usually two inches across and borne in loose clusters.

Emily Gray—The most beautiful yellow climber, with large golden buds and blooms which do not fade. The foliage is glossy, pointed, and holly-like. Growth very vigorous.

Excelsa—Brilliant scarlet-crimson flowers of great beauty.

Gardenia—The tight, very numerous little yellow buds, are beautiful in early summer, the flowers opening up creamy white jasmine scented. Trailing.

Hiawatha—Small flowers—deep ruby crimson, accentuated by a white eye—uniquely borne in long trails of 40 to 50 blooms.

Paul's Scarlet Climber—Vivid scarlet, good size, semi-double, freely produced in clusters of from 3 to 20 flowers each, the plants being literally covered from top to bottom with bloom.

Roserie (Pink Tausendschon)—Persistently deep, glowing pink. An excellent forcing variety.

Seven Sisters—Red to blush pink.

Silver Moon—Beautiful, semi-double, pure white, four inches in diameter, with a cluster of prominent yellow stamens in the center.

Tausendschon (Thousand Beauties)—A beautiful combination of colors, including several shades of pink. Semi-double.

Trier—Moderate grower with large clusters of small, creamy white flowers. Frequently blooms in autumn.

Dr. W. Van Fleet—Large flowers of exquisite pale pink on fine, long stems. Extremely vigorous, and has marvelously fine foliage. One of our most popular of all climbers.

Veilchenblau (Blue Rambler)—Double flowers of light lilac, shading light purple and blue.

White Dorothy—Duplicate of Dorothy Perkins except in color.

Hardy Perennials

PRICE OF ALL PERENNIALS (except where otherwise noted)

1931 Price 3 for 60c; 10 for \$1.75

1930 Price 3 for 75c; 10 for \$2.25

Chrysanthemum

All Our Plants are Two-Year Field-grown and Will Bloom This Year

Can be sent by parcel post for 2c each extra.

PERENNIALS are becoming more and more popular as once planted bloom year after year. No home grounds are complete without these continuously blooming plants. We list a wide variety so that you can have a succession of bloom of colors from early spring until late fall. All items

with star (*) may also be used for rock garden planting.

Anchusa (Alkanet) **Dropmore**—Tall spikes of beautiful blue flowers, blooming all summer. Rough broad foliage. 4 to 5 feet.

Anemone—Queen Charlotte: Abundant semi-double flowers, broad and perfectly formed; La France pink. 2-3 feet.

Anemone—Whirlwind: Excellent double white flowers. 2-3 feet.

Anthemis (Golden Marguerite) **Tinctoria**—Handsome, finely cut foliage, and large, golden yellow flowers produced all summer. Succeeds in the poorest soil; excellent cut flower.

Anemone

German Iris

Aquilegia (Columbine)—May to July. Single, long-spurred variety of colors red, blue, white, yellow.

Aquilegia—Long Spurred Hybrids: Wonderful flowers with very long-spurred flowers.

Artemisia (Sage Brush) **Lactiflora**—A tall-growing plant of fine foliage and heads of small white flowers in August and September, which fill the garden with fragrance. A splendid cut flower.

Begonia (Flowering)—Shining, deep green leaves. Immense clusters of flowers, red, pink, white. Blooms all summer.

Bleeding Heart—One of the most delightful of early spring flowering plants. Bears numerous rosy red, heart shaped flowers in drooping clusters. 50 cents each; 10 for \$4.75

Campanula Medium (Canterbury Bells) **Calycanthema** (Cup and Saucer)—Large, semi-double flowers, each resembling a cup and saucer. Pink, white, blue.

Campanula Medium (Single Canterbury Bells)—Beautiful rich shades in rose, blue and white.

***Centaurea** (Cornflower)—Makes a fine display in the border; also excellent for cutting. Rose-pink, violet-blue and white. June to September. 2 feet.

Chrysanthemum

Brune Poitevine—Of medium height and very early. This is an outstanding fine variety. Flowers are large, of a deep velvety reddish bronze completely covering the plant.

Excelsior—A very hardy and easily grown Mum. Medium early. About 24 inches high. Produces an abundance of shaggy deep yellow flowers. Good for cutting.

Firelight—Tall, midseason large flowering. Very showy spikes covered with heads of red flowers tipped with copper. Very hardy.

Indian—Late-flowering, very hardy variety of medium height. Flowers are shaggy and of peculiarly pleasing coppery red shade.

Snowdrop—Midseason and of good height, plant rather loosely formed. The best pure white button known, is very hardy.

Maloney Bros. Nursery Co., Inc.

Gaillardia

Chrysanthemum Maximum (Shasta Daisy)—Handsome plant, with large, glistening white blossoms in June and July.

Coreopsis (Tickseed) **Grandiflora**—Rich golden yellow flowers nearly all summer.

Delphinium (Larkspur) **Belladonna**—Large spikes of sky blue flowers, June until frost.

Delphinium Formosum—Rich blue flowers tinged with purple and having white eye.

Delphinium, Gold Medal Hybrids—The flowers range in color from light azure to deep blue and from delicate lavender to purple.

Dianthus (Pinks) **Barbatus** (Sweet William)—A fine plant which produces great masses of bloom of extremely rich and varied colors.

***Dianthus Plumarius** (Grass or Garden Pink)—Pink purplish, and white, fragrant flowers on long spikes.

Digitalis (Foxglove)—Thimble shaped flowers in shades of pink, purple-white. Tall spikes 4 to 6 feet high. June to September.

Eulalia Japonica Variegated (Ornamental Grass)—Very ornamental, long narrow leaves, striped green, white, and often pink or yellow.

Gaillardia (Blanket Flower)—Large flowers yellow and orange-red. Early summer to November.

***Geum** (Avens) **Mrs. Bradshaw**—A splendid new variety, with large, double flowers of a fiery red, blooming nearly all summer. 18 inches. 3 for 75 cents; 10 for \$2.25

***Geum, Lady Stratheden**—Rich golden yellow blossoms. 3 for 75 cents; 10 for \$2.25

Gypsophila Paniculata (Baby's Breath)—Mist-like sprays of minute white flowers. Fine for bouquets. Midseason.

Hardy Asters (Michaelmas Daisies)—**Blue Gem**: Double flowers of rich blue, the best blue in cultivation.

Hardy Asters—**Erica**: A beautiful clear pink; large semi-double flowers.

Hardy Asters—**Joan Vaughn**: Large, semi-double flowers of deepest blue.

Hardy Asters—**Mrs. Raynor**: The nearest red of all asters; good form.

Hardy Asters—**Novae-angliae**: Almost red and a profuse bloomer.

Hardy Carnations—Flowers large, very double, almost rival greenhouse carnations in size and beauty. A very valuable hardy plant. We offer them in double pink, red, yellow, white. July to late fall.

Heliopsis (Hardy Zinnia)—Deep golden yellow flowers about two inches in diameter, very thick texture.

Hibiscus—**Mallow Marvels**: A robust type of upright habit, producing an abundance of flowers of enormous size in the richest shades of red and pink.

Hollyhocks (*Althea Rosea*)—No perennial garden is complete without these. Their graceful spikes are a mass of flowers all summer. Double pink, scarlet, white, yellow.

Lathyrus (Everlasting Sweet Pea)—Clusters of large flowers on long stems produced in abundance. Excellent for covering rocks, stumps, walls. Red, white, pink.

***Lupinus** (Hardy Lupin)—They produce beautiful long spikes of pea-shaped flowers a foot long on stems three feet high. They are perfectly hardy but cannot endure drought. Clear blue. 3-4 feet. June-September.

***Lychnis Chalcedonica** (Maltese Cross)—Heads of vivid scarlet flowers blooming a long time. 3 feet.

Lychnis Viscaria Splendens (German Catchfly)—A splendid variety of tufted habit, with bright rose-pink flowers.

Papaver-Orientale (Oriental Poppy)—Tremendous scarlet, cup-shaped blooms of brightest crimson scarlet, with large purplish black blotches at base of petals.

Pentstemon (Beard Tongue) **Barbatus**—Pink Beauty: Beautiful shell-pink blossoms on spikes 30 inches long. Perfectly hardy in any soil and climate. Beautiful cut flower.

Physalis Francheti (Chinese Lantern)—Orange-red, bladder like fruits which cover the bush in late summer and autumn. Branches of fruit may be dried for winter decorations.

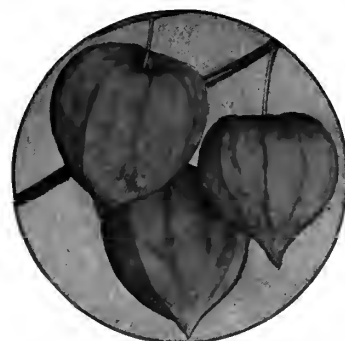

Pyrethrum (Painted Daisy)—Provides not only a colorful garden show from June throughout the summer, but also a charming cut flower. Red and pink.

Rudbeckia Purpurea (Purple Coneflower)—Peculiar reddish purple flowers with a very large, brown, cone-shaped center. July to October. 3 feet.

Scabiosa Caucasica (Blue Bonnet)—A soft and charming shade of lavender, commences to bloom in June, throwing stems 18-24 inches high until September. 3 for 75 cents; 10 for \$2.25

Sidalcea (Greek Mallow)—One of the finest of the new hybrid sorts which are just becoming known in this country. Its graceful spikes of rose-pink flowers resemble the larkspur.

Stokesia (Cornflower Aster) **Cyanea**—Grows 18-24 inches high, bearing freely from early June to late October, beautiful light blue blossoms.

Chinese Lantern

Delphinium

Order Early: See Page 40

Peonies

Thalictrum (Meadow Rue) **Dipterocarpum**—Flowers a charming shade of light mauve, which is brightened by a bunch of lemon yellow stamens and anthers; 4 feet. August and September.

3 for 75 cents; 10 for \$2.25

Tritoma (Red Hot Poker or Flame Flower)—Tall spikes surmounted by brilliant orange-scarlet flower heads. August to September.

Veronica Spicata—Long spikes of violet-blue flowers. 18 in. June and July.

Cannas

Hungaria—Green foliage. The petals are large and waxy, made up in big, round, full, trusses; one of the most attractive pink cannas ever produced.

King Humbert—The finest canna grown. Foliage rich reddish bronze. Flowers orange scarlet.

Richard Wallace. A pleasing canary yellow. Exceptionally large flowers which are carried well above the foliage. One of the best of the new yellow bedders. 4½ feet.

Shenandoah—Gorgeous, large trusses of pink flowers; foliage very beautiful, being of rich ruby red, exquisitely veined and tinted.

The President—The greatest red canna, possessing every desirable quality. Of immense size, unsurpassed in vigor, penetrating color and a free bloomer. 5 feet.

Varouna—Deep russet orange flowers of medium size which contrast very prettily with the deep bronze foliage. 4 feet.

Wintzer's Colossal—Vivid scarlet. Green foliage and perhaps the largest canna in cultivation. Color is a vivid, striking scarlet.

Wyoming—Bronze purple foliage, immense spikes of massive orange flowers. 6 feet.

Iris

Aurea—S. and F. rich chrome yellow. Large flowers of perfect form.

Caprice—S. Rosy red; F. Deeper rosy red.

Iris King—S. Lemon-yellow; F. Rich maroon, bordered yellow 22 inches.

Juniata—S. and F. Clear blue. Large, fragrant flowers. 44 inches.

Her Majesty—S. Rose pink; F. Bright crimson, shaded darker. 22 inches.

Loreley—S. Light yellow; F. Deep sea-blue, with creamy edging. 32 inches.

Rhein Nixe—S. Pure white; F. Deep violet-blue with white edge. 3 feet.

ROCK GARDEN PLANTS

Dahlia Tubers (LATE FALL)

PRICE, 35¢ EACH; 10 FOR \$3.00

Ambassador—Color, soft yellow buff, shaded salmon pink. Well formed flowers, held erect above the foliage. Bushes branch readily and produce a multitude of flowers.

Augustinus—Large flowers with long petals, which are more or less twisted. Color is a rosy salmon overlaid with bright metallic lilac. A very satisfactory dahlia. Vigorous grower.

Insulinde—An artistic dahlia of distinct form, with petals curled and twisted. Flowers mostly facing upward on long, strong stems. Color, a rich saffron yellow shaded russet orange.

Jersey's Beauty. Probably the most popular of any dahlia especially as a cut flower. The ideal pink for exhibition or florist use. Large, deep flowers of perfect form on long stems. Free, early bloomer with exceptional keeping qualities.

Mahogany—A dark red American Cactus on a good erect stem. Large flowers of good form with full centres. Dark velvety red.

Mina Burgle—Color rich cardinal red, it is of fine form. The plant is a strong vigorous grower, producing the flower freely on long, stiff stems.

Snowdrift—Large pure white with broad, rather flat waxy petals. Has a good stem by dis-budding. A good bloomer and easy to grow.

Sunny Jersey—With flowers a foot or more above the foliage on erect stems. Color, lemon yellow with golden suffusion.

Gladiolus (LATE FALL)

PRICE 10¢ EACH; 10 FOR 75¢; 25 FOR \$1.50

Alice Tiplady—Soft, orange saffron shade. Extra fine.

Anna Eberious—Velvety violet purple, throat deeper color. This variety has created a sensation with growers and amateurs alike.

Byron J. Hulot—Tall plant, medium size flowers, dark, velvety purple.

Byron L. Smith—One of the very best. Most refined lavender pink on white ground. Exceedingly fine as a cut flower. Color equal to a very choice attaya orchid.

Crimson Glow—Immense open flowers of intense rich crimson. Tall vigorous and perfectly formed. The very finest of its color.

Golden Measure—Conceded by many to be the finest golden yellow Gladiolus. Extra tall spikes. Large, wide open golden yellow blooms, deeper throat. No markings. Extra fine.

Los Angeles—A beautiful shrimp-pink. Just a little salmony, tinted orange. A most sturdy, rank, healthy grower. Many blossoms open at a time.

Mary Pickford—An extraordinary flower of most delicate cream-white. Finest soft sulphur-yellow throat. Good-sized blooms. Many open at a time. A grand white.

1910 Rose—Extra large flower, pure rose-pink of a very fine shade. Lower petals marked with narrow white line through center. Very fine.

Lily Bulbs

PRICE 45¢ EACH; 10 FOR \$4.00
(except as noted)

Auratum (Gold Banded Japan Lily) — Its large graceful, fragrant flowers are composed of six petals of a delicate ivory-white color, thickly studded

Gladioli

with chocolate-crimson spots and striped through the center a golden yellow. 3-5 feet. July to September. 8-9 inches.

Speciosum Album—Pure white, with a green band traversing the center of each petal. August. 55 cents each; 10 for \$5.00

Speciosum Magnificum—Large flowers of rich, deep red. August. **Speciosum Rubrum**—Blooms profusely during August. Petals white, spotted with crimson. 8-9 inches.

The Regal Lily (Regale)—Spikes of medium height, bearing several large, fragrant blooms on a stem. White with yellow center, shaded rose on outside of petals. Early July. One of the very best.

Formosum Lily—Japanese Easter Lily. Large, white trumpet-shaped blooms. 7-9 inches.

Paeonia

Alexandre Dumas—Light violet-rose. Early. 50 cents each

Edulis Superba—Brilliant rose pinkish center. Early. . . 40 cents each

Felix Crousse—A rich, brilliant, dazzling, ruby red. . . 60 cents each

Festiva Maxima—Pure white with crimson markings in the center; fragrant. Early. 35 cents each

Louis Van Houtte—Large, dark crimson purple variety. None better. Late. 35 cents each

Mme. Ducler—A compact, bomb type flower of mauve-pink and silver. 50 cents each

Model of Perfection—Very late, very double, pyramidal shaped flower of a light soft violet-rose with shades of flesh pink, marbled and veined with bright rose and silver tipped. 60 cents each

Ornamental Trees

Japanese Flowering Cherry

YOUR home grounds are not complete without some shade and ornamental trees. The shade of Maples and the dark covers under Evergreens are never forgotten by those who in childhood played around the trees. A comparison of a home without shade about it, to one with, is the best argument we can advance.

Birch, European—An attractive, white-barked tree. Strong grower.
8 to 9 ft. \$1.75 each

Birch, Cut-Leaved Weeping—Its tall, slender, yet vigorous growth, graceful branches, silvery white bark and delicately cut foliage present a combination of attractive characteristics rarely met with in a single tree.

5 to 6 ft. \$2.00 each
6 to 8 ft. \$2.50 each

Catalpa Bungei (Umbrella Catalpa)—It makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves large, glossy, heart-shaped.
5 to 6 ft. \$1.30 each, 2 for \$2.50

Catalpa Speciosa—Rapid grower. Large, heart-shaped downy leaves, and compound panicles of white flowers.
6 to 8 ft. 90 cents each; 10 for \$8.50
8 to 10 ft. \$1.10 each; 10 for \$10.00

Cherry, Japan Weeping Flowering—Beautiful pink flowers bloom in early May before the leaves appear and resemble miniature roses. The mass of bloom completely conceals the branches of this beautiful lawn specimen tree.
5 to 6 ft. stems \$2.75 each

Schwedler's Maple

European Mountain Ash

Cherry, Kanzan Flowering Cherry—One of the famous flowering cherries which attract so much admiration in Washington, D.C. Beautiful, glossy pink flowers in great profusion before the leaves appear. Of delightful fragrance.
4 to 5 ft. \$2.50 each

Crab, Bechtel's—When in bloom appears to be covered with delicate pink, perfectly double small roses of delicious fragrance.
3 to 4 ft. \$.75 each
4 to 5 ft. \$1.00 each

Crab, Floribunda—A large shrub or small tree, often thorny, with rose-red flowers borne in great profusion in May.
3 to 4 ft. \$.75 each
4 to 5 ft. \$1.00 each

Crab, Floribunda Purpurea—A beautiful form of above with darker red flowers.
3 to 4 ft. \$.75 each
4 to 5 ft. \$1.00 each

Crab, Parkmani—An elegant Japanese dwarf with long-stemmed semi-double flowers of deep rose color wreathing its branches. The buds are long and handsome.
3 to 4 ft. \$.75 each
4 to 5 ft. \$1.00 each

Cornus Florida (White flowering Dogwood)—Flowers white 3 to 3½ inches in diameter, produced in spring before leaves appear; very abundant, showy and durable. Foliage grayish green, glossy and handsome; in the autumn turning to deep red. Spreading, irregular form, growing 20 to 25 feet high. Used with telling effect in tall shrub backgrounds and corner groups, to inject sparkling white bloom in spring, and for crimson autumn foliage.
3 to 4 ft. \$1.25 each

Cornus Florida Rubra (Red Flowering Dogwood)—Slower growing and more formally shaped, with handsome red flowers. An attractive lawn specimen or group subject. Shipped out "Balled and Burlapped".
2 to 3 ft. \$3.50 each

Elm, American—A natural spreading and drooping tree of our own American meadows and forests. Is entirely hardy and easily transplanted.
8 to 10 ft. \$1.50 each; 10 for \$12.50
10 to 12 ft. \$2.00 each; 10 for \$17.50

Maloney Bros. Nursery Co., Inc.

Elm, Chinese—A new introduction from China. This variety is a very rapid grower. Known to have reached a height of 20 feet six years after planting an 8 to 10 ft. tree. Resembles the popular Norway Maple in shape. Good foliage, more dense than other elms. Exceptionally adapted for street and shade planning where quick results are desired. Grows 75 feet high.

6 to 8 ft. \$2.00 each
8 to 10 ft. \$2.75 each

Flowering Peach—In May every branch is covered with a mass of beautifully formed, double red or white flowers, producing a charming effect.

3 to 4 ft. 85 cents

Horse Chestnut, White Flowering—Very handsome; has magnificent spikes of white flowers. As a lawn tree or for the street it has no superior.

4 to 5 ft. \$1.00 each

Judas Tree (Red Bud)—A small growing tree of irregular form, with heart-shaped leaves. It is covered with delicate pink blossoms early in spring before the leaves appear, a charming association among the tender greens and bronzes of young foliage.

4 to 5 ft. \$1.35 each

Linden, American—A stately tree, growing 60 to 80 feet tall, with large, shining cordate leaves. Valuable for its beautiful white wood. Its flowers appear in July.

6 to 8 ft. \$2.25 each

Linden, European—A medium growing, symmetrically shaped tree with dense foliage. The leaves are deep green above, silvery beneath. Very attractive yellowish-white flowers appear in June in drooping clusters of from five to twenty blossoms to a cluster.

6 to 8 ft. \$3.00 each
8 to 10 ft. \$3.75 each

Magnolia Glauca (Sweet Bay)—When planted in moist soil this makes a handsome tree 30 to 40 feet high but in the drier lawns is much smaller. Its broad leaves are glossy, laurel-like, almost evergreen. In June its large, waxy white flower-cups are lovely and exquisitely fragrant.

2 to 3 ft. \$3.75 each

Crab

Prunus pissardi

Dansville, New York

Maple, Ash-leaved (Box Elder)—Fine, rapid grower, handsome light green foliage and spreading head.

6 to 8 ft. 75 cents
8 to 10 ft. \$1.00 each

Maple, Japan (Red Leaved)—Dwarf trees. Their early and mid-summer aspect is vivid blood-red, which dulls to a bronzy purple towards fall.

2 ft. \$5.00 each

Maple, Norway—This is one of the hardiest ornamental shade trees, and one of the most beautiful. It makes more of a wide spreading tree than the sugar maple.

6 to 8 ft. \$1.75 each; 10 for \$15.00
8 to 10 ft. \$2.25 each; 10 for \$20.00
10 to 12 ft. \$3.00 each; 10 for \$25.00

Maple, Silver-leaved or Soft—Foliage bright green above and silvery underneath. An exceedingly rapid grower, makes a large tree.

6 to 8 ft. 85 cents each; 10 for \$7.50
8 to 10 ft. \$1.25 each; 10 for \$10.00

Maple, Schwedler—Reddish purple foliage in early Spring, changing to deep bronze in Fall.

6 to 8 ft. \$3.25 each

Maple, Sugar or Rock—Is considered slow grower, but longlived.

8 to 10 ft. \$2.50 each

6 to 8 ft. \$2.00 each

Maple, Wier's Cut-Leaved—Beautiful tree with cut or dissected foliage. Shoots slender and drooping, as graceful as cut-leaved birch.

8 to 10 ft. \$1.50 each; 10 for \$12.50
6 to 8 ft. \$1.00 each; 10 for \$9.00

Mountain Ash, European—A very beautiful tree for ornamental planting. In the early Fall it bears clusters of bright red berries.

6 to 8 ft. \$1.25 each
8 to 10 ft. \$1.50 each

Mulberry, Downing—Not alone valuable for the large, refreshing berries, but is very handsome as a lawn or street tree.

6 to 8 ft. \$1.25 each

Mulberry, Russian—Very hardy, vigorous grower, very productive, fruit black and of medium size.

5 to 7 ft. 75 cents each; 10 for \$6.50

Mulberry, Tea's Weeping—The most graceful and hardy weeping tree. Forms a perfect shaped head, with long, slender willowy branches drooping to the ground.

5 ft. 2 year heads. \$2.50 each

Oak, Pin—Fastest growing of all the oaks and easily transplanted. Best shade tree for damp or heavy soil.
5 to 6 ft. \$2.50 each

Oak, Red—Young shoots come out crimson in the spring and leaves turn purplish crimson in the fall.
5 to 6 ft. \$2.50 each

Oriental Plane—A hardy, rapid growing tree. Beautiful dense foliage.
6 to 8 ft. \$1.25 each

Poplar, Carolina—The most rapid grower among shade trees, frequently growing eight feet during one season and thus making fine shade in two or three years. Will grow in any kind of soil.
6 to 8 ft. 50 cents each; 10 for \$4.50; 50 for \$20.00
8 to 10 ft. 75 cents each; 10 for \$6.50; 50 for \$25.00
10 to 12 ft. \$1.00 each; 10 for \$9.00; 50 for \$32.50

Poplar, Lombardy—Well known for its tall, spire-like form. Where it is desired to mark a boundary line, or where there is an entrance to a driveway these trees are very effective. Transplant safely.
6 to 8 ft. 65 cents each; 10 for \$6.00
8 to 10 ft. 85 cents each; 10 for \$7.50

Prunus Pissardi (Purple-Leaved)—Leaves when young are a lustrous crimson, changing to dark purple, and retain this beautiful tint until they drop late in the autumn; no other purple-leaved tree retains its color like this. Flowers small, white, single, covering the tree.
4 to 5 ft. \$1.00 each
5 to 6 ft. \$1.25 each

Russian Olive—Useful in tall dense groups for sharp color contrasts. Tree attains a height of from 20 to 30 feet, bark dark green, foliage rich silver color, willow shape; flowers deep golden and, very fragrant, followed by ornamental olive fruits.
4 to 5 ft. 80 cents each

Thorn, Paul's Double Scarlet—Flowers deep crimson with scarlet shade; very double.
5 to 7 ft. \$2.25 each

Willow, Babylonica—Well known weeping variety; forms a large round-headed, graceful tree; is quite desirable.
6 to 8 ft. \$1.00 each
8 to 10 ft. \$1.25 each

Catalpa on Either Side of Entrance is Very Effective

Teas Weeping Mulberry

Willow, Golden—Especially desirable on account of its golden colored bark with light green leaves. Asplendid grower.
6 to 8 ft. 75 cents each
8 to 10 ft. \$1.00 each

Nut Trees

Butternut—A fine native tree.
4 to 5 ft. 85 cents each;
10 for \$7.50

Filbert, English (Hazelnut)—Succeeds on almost all soils, bearing early and abundantly.
3 ft., 75 cents each; 10 for \$7.00

Pecans—Tree very productive; nuts delicious, thin shelled.
3 to 4 ft. \$1.50 each

Walnut, English—A fine, lofty growing tree, with handsome spreading head; produces large crops of thin-shelled delicious nuts.
3 to 4 ft. \$1.25 each; 10 for \$11.00
4 to 5 ft. \$1.50 each; 10 for \$13.00

Walnut, Black—Is very productive.
5 to 6 ft. 85 cents each; 10 for \$7.50
4 to 5 ft. 70 cents each; 10 for \$6.50

Privet Hedge

Maloney's Hedges

Wisteria

HEDGES give a finish that nothing else can give and serve as a fence as well.

Plant Privet 1 foot apart in double rows, and rows 1 foot apart alternated.

Barberry Thunbergi—A pretty plant of dwarf habit from Japan. Very graceful and its foliage turns to a beautiful red in the fall. 2 year, strong plants, well branched. 18 to 24 in., 20 cents each; 10 for \$1.75; 100 for \$13.50. 2 to 3 ft., 25 cents each; 10 for \$2.00; 100 for \$16.00.

Privet, Amoor River—Hardy. Of similar form to the California type, not so lustrous, but the safest substitute for cold climates. 2 year, strong plants, well branched. 18 to 24 in., 10 for \$1.25; 100 for \$8.00; 1000 for \$75.00. 2 to 3 ft., 10 for \$1.50; 100 for \$9.50; 1000 for \$85.00.

Privet, California—Of all ornamental hedge plants this is the most highly prized. The leaves are a rich green and will remain on the plants up to Christmas, and if they are a little sheltered they will keep green almost all winter.

2 year, strong plants, well branched. 18 to 24 in., 10 for 75c; 100 for \$4.50; 1000 for \$37.50. 2 to 3 ft., 10 for \$1.00; 100 for \$5.50; 1000 for \$45.00.

Privet, Regel's—A strong, very hardy type with dark and shiny leaves. The numerous branches are stiff, twiggy and horizontally spreading, gracefully drooping at the ends. Makes a naturally wide, dense bush particularly adaptable to foundation plantings. 18 to 24 in. 10 for \$2.50; 100 for \$20.00

Norway Spruce—
18 to 24 in. 10 for \$10.00
2 to 2½ ft. 10 for \$12.50; 100 for \$100.00

Vines

Give Shade and Ornamentation

STRONG TWO YEAR VINES—PRICES (except as noted) 40C EACH. If by parcel post 3c each extra.

The types which cling to wood, stone, brick or stucco are designated by a star (*), the rest twine or need support.

Bittersweet (Celastrus)—Handsome, glossy foliage and large clusters of beautiful, orange-crimson fruits retained all winter. Its graceful sprays of berries make charming winter house decorations. 60 cents each

Clematis, Henryi—Free bloomer, producing large, white flowers constantly during the summer and early autumn. 75 cents each

Clematis, Jackmanni—Flowers large, rich, velvety violet-purple, produced in masses forming a cloud of bloom. 75 cents each

Clematis, Mme. Andre—Distinct crimson red. 75 cents each

Clematis, Paniculata—Rapid grower, covering trellises and arbors with handsome, clean glossy foliage. The flowers are of medium

size, fragrant, pure white, borne in immense sheets in September, when very few other vines are in bloom.

Dutchman's Pipe—Brownish flowers, resembling a miniature pipe; splendid for archways or verandas. 75 cents each

Ivy, American or Virginia Creeper—A native vine of rapid growth, with large, luxuriant foliage.

***Ivy, Boston** (Ampelopsis Veitchi)—Fine for covering walls, as it clings firmly to the smoothest surface, covering it closely with overlapping foliage, giving the appearance of being shingled with green leaves.

Ivy, English—Foliage dark glossy green. Evergreen. 65 cents each

Honeysuckle, Hall's Japan—An almost evergreen honeysuckle of great value, hardy and of strong growth. The flowers are fragrant, of a pure white, changing to yellow.

Honeysuckle, Scarlet Trumpet—Trumpet shaped flowers of bright scarlet.

Matrimony Vine—Ornamental shrubby climber. Small, purplish flowers in summer, followed by scarlet berries until late in winter. 50 cents each

Silver Lace Vine—Will clamber gracefully up a trellis, over a tree trunk, a wall, a porch, an arch. It will rapidly climb 20 feet or more, with green foliage lightly bronzed at the tips. A well-grown specimen is a cloud of lacy, misty white, shot with tints of cream and pale rose of most exquisite effect. 60 cents each

..... 60 cents each

Vinca Minor (Hardy Myrtle)—A trailing evergreen plant used extensively for carpeting the ground under shrubs or trees where it is too shady for grass or other plants to thrive. Having a busy root system, it is often used for coverage on sloping banks not too dry. In early summer, there are many solitary, single lilac-blue flowers. 3 for 50 cents

Wisteria, Chinese Purple—A most beautiful climber of rapid growth, producing long, pendulous clusters of flowers. 60 cents each

Wisteria, White—Same characteristics as Wisteria Purple. 60 cents each

Silver Lace Vine

ORDER EARLY

See Page 40

Evergreens

Pfitzer's Juniper

WE wish we were competent to picture the beauty and utility of the aristocratic evergreen. They have an individual attractiveness which they retain throughout the entire year. Their green foliage of every possible shade is particularly pleasing during the winter months, when everything else is bleak and dreary. The many different types and forms which we offer makes it possible to secure varieties appropriate for any planting.

All evergreens will be lifted with ball of earth and roots wrapped in burlap. Leave ball of earth and burlap on when planting. Wet ground after planting until like mud, then one pail of water each week for first summer. Do not trim tops of evergreens.

Arbor Vitae, American—A beautiful native tree much used for hedges, screens, singly on lawn and in tubs for porches. Can be trimmed and kept in any form or height.

18 to 24 in. \$1.25 each; 10 for \$11.00
2 to 2½ ft. \$1.50 each; 10 for \$13.50
2½ to 3 ft. \$1.75 each; 10 for \$16.00
3 to 4 ft. \$2.00 each; 10 for \$17.50

Arbor Vitae, Globosa—Forms a dense, low globe; handsome shade of green.

18 to 24 in. \$1.75 each

Arbor Vitae (George Peabody), Golden—Dwarf, dense-growing variety, holding its golden yellow color all summer. 18 to 24 in. \$2.75 each

Arbor Vitae, Oriental—A comparatively low, broadly pyramidal tree, native of Asia. Its color is a refreshing yellowish green similar to Hovey's although dulling to bronzy green in winter. 2 to 2½ ft. \$2.25 each

Arbor Vitae, Pyramidal—A valuable upright evergreen of dense, compact habit. Foliage light green. 18 to 24 in., \$2.00 each; 2 to 2½ ft., \$2.50.

Arbor Vitae, Siberian—A superb hardy variety, somewhat similar to American, with heavier and fuller foliage and more compact habit; bears trimming well. This variety is extensively

An Attractive Planting of Evergreens

sively used for backgrounds in foundation plantings, where dense bushiness is required, rather than height. 2 to 2½ ft. \$2.75 each

Arbor Vitae, Tom Thumb—Small and compact. Very desirable for planting in evergreen groups and low hedges. 18 to 24 in. \$1.75 each

Fir, Douglas—Popular for its hardiness and great beauty; dark green.

2 to 2½ ft. \$2.75 each; 10 for \$22.50
2½ to 3 ft. \$3.00 each; 10 for \$27.50
3 to 4 ft. \$3.50 each; 10 for \$30.00

Fir, White (A. Concolor)—A picturesque Colorado species; long leathery leaves, with glaucous tinge when young, becoming pale green with age. Branches arranged in horizontal whorls. A broad-based, tapering tree making a splendid specimen. 15 to 18 in. \$3.50 each

Hemlock, Canadian—The best evergreen in heavy shade; and both beautiful and dependable wherever used. Its refined foliage is lacy, close-set and darkly lustrous, in rather flat fronds which droop gracefully. Although capable of great height, it is best known as a moderate grower adapted to severe pruning; used at corner; or as foundation screens; or in formally sheared high hedges.

2 to 2½ ft. \$2.75 each
3 to 3½ ft. \$3.00 each

Juniper, Irish—A distinct and beautiful variety, forming a tapering column. Much used for cemetery plantings.

18 to 24 in. \$1.50 each
2 to 2½ ft. \$2.00 each
2½ to 3 ft. \$2.50 each

Juniper, Pfitzers—Of the spreading type this is perhaps the most popular. Foliage a grayish green, slightly drooping and branches are horizontally spreading.

18 to 24 in. \$3.25 each

Juniper, Virginiana (Red Cedar)—A well-known American tree, with fine, dense foliage, varying in habit and color, the majority being formal and bluntly conical. Makes a fine tree for planting on each side of an entrance or in back of low growing varieties. 18 to 24 in. \$2.25 each

Pyramidal Arbor Vitae

*Pyramidal Tom Thumb American
Arbor Vitae Arbor Vitae Arbor Vitae*

*Pfitzers Globosa Black Hills
Juniper Arbor Vitae Spruce*

Juniperus, Virginiana Glauca (Blue Cedar)—Its beautiful glaucous blue foliage makes it one of the choicest Junipers.

2 to 2½ ft. \$4.50 each

Pine, Mugho—The only genuine Dwarf Pine. Leaves short, stiff and formal, thickly distributed in tufts over the branches in a crowded way somewhat similar to Austrian, with an equal depth and richness of color. Does not grow tall, but spreads out, generally assuming a globular form; very dense. Popular in the foreground of foundation plantings, and in pairs for punctuation.

15 to 18 in. \$3.25 each

Pine, Scotch—A very rapid grower. The branches strong. Foliage is a bluish green. 2½ to 3 ft. \$2.50 each; 10 for \$20.00

Retinospora Pisifera—Foliage feathery light green, glaucous beneath. 18 to 24 in. \$2.50 each

Retinospora Plumosa (Plumed Cypress)—This is one of the best pyramidal varieties. Foliage a grayish green, very finely cut and has a feathery appearance. 18 to 24 in. \$2.50 each

Retinospora Plumosa Aurea (Golden Plumed Cypress)—Soft, plume-like, golden foliage, particularly bright in spring and contrasting beautifully with green grass and other evergreens. 18 to 24 in. \$2.50 each

Spruce, Black Hills—Makes a very close and compact growth. The foliage shades from green to a bluish tint. This is a very hardy variety.

18 to 24 in. \$1.75 each; 10 for \$15.00

2 to 2½ ft. \$2.00 each; 10 for \$17.50

2½ to 3 ft. \$2.50 each

3 to 4 ft. \$3.00 each

Spruce, Colorado Blue—This is hardy, healthy and very beautiful. Its foliage is a steel blue.

18 to 24 in. \$4.00 each

2 to 2½ ft. \$5.00 each

2½ to 3 ft. \$7.50 each

Spruce, Colorado Green—The origin of the famous Blue Spruce. A vigorous grower and hardy, making fine specimens in a broad based, sharply defined pyramidal form; foliage rigidly angular with sharp needles very densely set. Light green color.

18 to 24 in. \$2.00 each

2 to 2½ ft. \$2.50 each

2½ to 3 ft. \$3.00 each

Spruce, Norway—The most extensively planted of all evergreens. It is a rapid grower, extremely hardy. Is often used for hedges or can be planted effectively in groups.

18 to 24 in. \$1.25 each; 10 for \$10.00

2 to 2½ ft. \$1.50 each; 10 for \$12.50; 100 for \$100.00

2½ to 3 ft. \$1.75 each; 10 for \$15.00

3 to 4 ft. \$2.50 each; 10 for \$27.75

Spruce White (Picea Alba)—One of the very best conifers especially for cold climates. Compact, upright, long-lived, retaining its branches to the ground; aromatic, drought-resisting; varies in color from light green to glaucous blue.

2 to 2½ ft. \$2.00 each

2½ to 3 ft. \$2.50 each

Taxus Cuspidata (Japanese Yew)—One of the hardiest of Yews. Bushy, upright, spreading nature, with rich green foliage. A beautiful, medium sized specimen, equally well suited for foundation planting.

18 to 24 in. \$6.00 each

Taxus Cuspidata Nana Brevifolia (Dwarf Japanese Yew)—Irregular, unique outline, with deep green foliage. Very popular for a place where a low, spreading plant is wanted.

12 to 15 in. \$4.00 each

EVERGREENS are used extensively for foundation and lawn planting. Easy to grow when following Maloney instructions. Note planting directions as illustrated—follow carefully.

Plant about 2½ feet from foundation and in double rows 3½ feet apart.

Pruning should consist principally of the shearing or clipping of the terminal growth in the spring just when the new growth appears. This keeps your trees compact and once they get to the height you want them they can be kept this way like a hedge. Don't prune too late in the summer.

How to Plant Evergreens

- (1) Dig hole a foot larger and deeper than ball of earth. Provide good, loamy top soil to fill around ball.

Rhododendrons

Rhododendrons

BALLED AND BURLAPPED

Carolinianum (Carolina)—Most beautiful of American Rhododendrons. Flowers appear in June, in great profusion, a beautiful pink. Will stand exposed locations, perfectly hardy, thriving in either sun or shade.

18 to 24 in. clumps.....\$3.00 each

Catawbiense—Flowers a bright rose-purple, borne in large clusters at the ends of the branches. Perfectly hardy in Northern latitudes and one of our very finest broad-leaved evergreens.

18 to 24 in. clumps.....\$3.00 each

Maximum (Great Laurel)—A well-known native of our mountain regions, with great clusters of white or rose-pink flowers in June and July; just after the hybrid varieties have ceased blooming.

18 to 24 in. clumps.....\$3.00 each

If space requires additional plants increase on these varieties using high growing in background, medium and low growing in foreground. Medium growing are most satisfactory for planting under windows.

Azaleas, Daphne and Rhododendrons are used for individual, group and foundation plantings with evergreens.

Azaleas

BALLED AND BURLAPPED

Amoena (Hardy Evergreen Azalea)—Low bushy shrub, small green leaves, changing in winter to a bronze or coppery brown. In spring covered with a wealth of claret-purple flowers which continue to open for a period of 2 or 3 weeks.

12 to 15 in.....\$2.75 each

Lutea Calendulacea (Flame colored Azalea)—Ranging from flame color through shades of red and yellow, remaining in bloom for several weeks. Grows in cultivation from 6 to 8 feet high.

15 to 24 in.....\$2.50 each

Daphne

Daphne Cneorum—One of the few varieties of "Garland Flowers" should be given a sunny location. It is a very dwarf shrub, almost evergreen, with spreading branches on which the narrow, inch-long leaves are crowded; making very pretty trails of blue-green foliage. The soft pink flowers appear profusely during April and May, and at intervals throughout the summer; very small and dainty in terminal clusters, with a distinct and very pleasing fragrance.

10 to 12 inches (B. and B.).....\$2.00 each

Boxwood

Dwarf Edging—For low hedges.

6 to 8 in.....10 for \$5.00; 100 for \$50.00

Tree Bush Form—Slow-growing, suitable for garden hedges, window-boxes, or as specimens.

10 to 12 in.....\$1.00 each; 10 for \$7.50

Azalea

Fruit Department

GROW YOUR OWN FRUIT

YOU will never know the highest satisfaction of fruit until you eat it fresh-picked, fully ripe and out of your own yard. The home orchard is coming back into popularity; more and more people are beginning to realize the value and convenience of the home orchard. Then, too, people are discovering that a few fruit trees in the back yard furnish as much shade and are equally as attractive as the ordinary ornamental tree.

Maloney's fruit trees and plants are grown on the upland. We are specialists in growing fruit trees and plants. All are propagated on the upland at an elevation of 1500 feet; they are hardy and

healthy. Our fruit trees are budded on whole branched rooted seedlings, and scions for budding are cut from bearing trees of best strains; consequently, Maloney varieties are absolutely dependable. We have large blocks of all kinds of fruit trees, supplying many of the largest orchard planters in the United States. We propagate under careful conditions and dig by steam power, thereby, enabling us to take up the tree equipped with its entire fibrous root system; such trees grow rapidly and bear early. It is just as important to cultivate newly planted fruit trees as corn, beans or potatoes.

How to Plant and How to Prune

- 1 SET PLANT SLIGHTLY DEEPER THAN IT STOOD IN NURSERY
- 2 SPREAD ROOTS OUT NATURALLY
- 3 SHAKE GOOD SOIL DOWN AMONG ROOTS. WORK IN WITH FINGERS
- 4 SHAKE TREE UP AND DOWN TO SETTLE DIRT
- 5 TREAD SOIL FIRMLY WHEN HOLE IS HALF FULL
- 6 FILL HOLE AND TRAMP SOIL. THE LIGHTER THE SOIL THE HARDER THE TRAMP
- 7 LEAVE LOOSE SOIL ON TOP OR COVER GROUND WITH MULCH
- 8 POCKET LEFT TO CATCH WATER
- 9 NOTE—MANURE, UNLESS WELL ROTTED AND THOROUGHLY MIXED WITH THE SOIL SHOULD BE USED ONLY ON TOP IF USED AT ALL.

In pruning Apple, Plum, Cherry and Pear trees, cut the side branches to 6-8 inch stubs and do not leave more than five to a tree. See that these are distributed around the trunk. The peach tree requires a little more severe pruning. One year trees are simply headed to whatever height they are wanted.

NOTE—Always keep the roots covered. Dig hole large enough to receive plant without bending roots. Break up subsoil when it is very hard.

Before Pruning

After Pruning

A two-year-old tree before pruning and after pruning. Try not to have two branches nearly opposite. They will form a bad crotch when the tree is older.

Raspberries

PRICE OF NO. 1 STRONG BEST SELECTED RED
AND BLACK RASPBERRIES

25 FOR \$1.10; 100 FOR \$3.00; 500 FOR \$12.25
1000 FOR \$23.50

PARCEL POST—Raspberries can be sent by parcel post, postage prepaid, for two cents per bush extra.

NO berries are relished like the berries from your own garden. Berries lose flavor and firmness rapidly after being picked.

For real berry-eating try picking a quart or two from your own bushes, and eat within an hour.

Raspberries and blackberries very economical to grow will succeed in about the same ground as would vegetables. They may be planted in rows in the garden or along fences; partial shade is no hindrance.

Red Raspberries

Cuthbert—This is a valuable variety, well tested throughout the country. Cuthbert is a good vigorous grower and possesses vitality necessary for a popular variety. It yields bountifully of large and beautiful bright red berries, which are easily picked and always command good prices. No fruit grower can afford to omit planting Cuthbert, and surely no person who has a garden should attempt to get along without red raspberries.

St. Regis (Everbearing)—This is a valuable addition to the Red Raspberry list. Plants that are set early in the spring will give a small crop of fruit the fall following. In size and quality it has no equal. About the middle of June it commences to set fruit on the young canes and bears continuously from then until frost. The berries are large, beautiful and attractive.

Plum Farmer Raspberry

Cuthbert

Latham—This variety is certified absolutely mosaic-free, perfectly hardy. Its production is superlative, out-yielding even Cuthbert. The berries are large and round, with profitable shipping firmness. The color is a richly brilliant red.

25 for \$1.75; 100 for \$5.00; 500 for \$20.00; 1000 for \$37.50

Black Raspberries

Cumberland Black—This berry combines the equally valuable characteristics of great firmness, splendid quality and wonderful productiveness. Fruit firm. Mid-season.

Kansas Black—This variety is a strong, vigorous grower, standing extremes of drought and cold, and bearing immense crops. Early.

Plum Farmer Black—This very large and productive black raspberry has been thoroughly tested. It is a great favorite for market or home use. It is covered with a grayish bloom, like the bloom on a grape, which makes it very attractive in appearance. It ripens very early and quickly. The fruit is enormously large.

Purple Raspberries

Columbian Purple—A strong grower, unexcelled for productiveness and desirable for canning. Fruit very large, purplish color, rather soft; rich, sprightly flavor.

25 for \$1.50; 100 for \$3.75; 500 for \$15.00; 1000 for \$27.50

Yellow Raspberries

Golden Queen—A beautiful, large golden yellow berry surpassing Cuthbert in size, beauty, quality and adaptability. This variety is not only one of the most delicious to the taste, but makes an enticing appearance when served fresh, either alone or in mixture with the other colors of berries. Canes hardy, of strongest growth, productive. 25 for \$2.50; 100 for \$6.00

Blowers Blackberry

Blackberries

PRICE OF NO. 1, STRONG PLANTS,
BEST SELECTED VARIETIES

25 FOR \$1.25; 100 FOR \$4.00; 500 FOR \$17.00
1000 FOR \$32.50

Blowers—Claimed to be the hardest, most productive, of finest quality and to bring the highest market price.

Eldorado—The vines are very hardy and vigorous, and their yield is enormous. The berries are large, jet black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core and keep for eight or ten days after picking with quality unimpaired.

Mersereau—Remarkably strong grower, upright, producing stout, stocky canes. An enormous producer of extra size berries, which are brilliant black and retain color; extra quality; sweet, rich and melting, without core. Ripens very early.

Snyder—Extremely hardy, enormously productive, medium size, no hard, sour core; sweet and juicy. Ripens early.

Downing

Dansville, New York

Dewberry

Lucretia—It equals any of the tall growing sorts. Perfectly hardy, healthy and remarkably productive, with large, showy flowers. The fruit, which ripens early, is often 1½ inches long by 1 inch in diameter; soft, sweet and luscious. . . . 25 for \$1.00; 100 for \$4.00

Currants

PRICE OF ALL VARIETIES: EXTRA SIZE, 2 YEAR BUSHES,
20C EACH; 10 FOR \$1.50; 100 FOR \$12.00

PARCEL POST—Currants can be sent by parcel post, postage prepaid, for 5c per bush extra.

Cherry—Fruit averages large; color fine, bright red; berry thin skinned, juicy and fine flavored. Very productive.

Diploma—Large, solid and of good quality, very attractive appearance, both clusters and berries being very large. Vigorous grower and the most productive red currant.

Perfection—In color it is a beautiful bright red, a size larger than the Fay; clusters average longer and the size of berries is maintained to the end of the bunch.

Red Cross—A strong growing variety. Cluster long; berry medium to large, bright red; quality good to best. It is exceedingly productive, and the currants are of large size and unusually sweet.

White Grape—Berries large to very large, averaging large; of very attractive color, mild flavor and good quality.

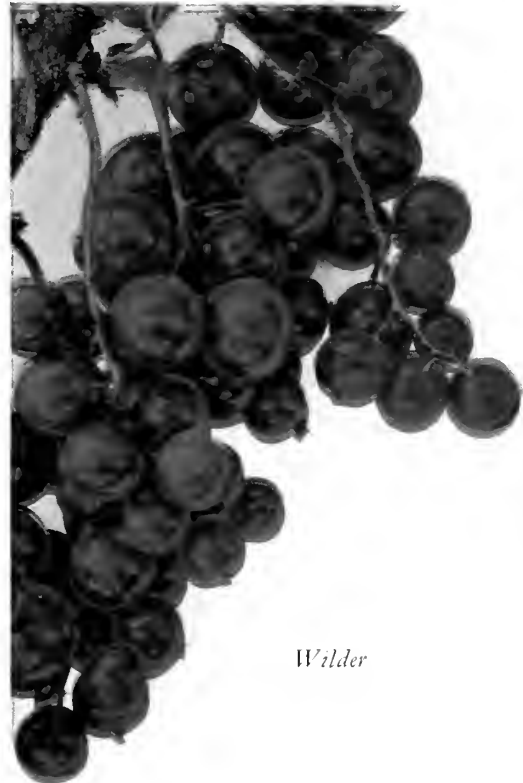

Wilder—Bush upright, vigorous; clusters above medium length; berries large to very large, averaging large; bright red; excellent, with a mild sub-acid flavor. Ripens early and remains bright and firm until very late.

Gooseberries

PRICE: TWO YEAR BUSHES, 25C EACH; \$2.00 PER 10

Downing—Fine quality, vigorous growth and free from mildew.

Josselyn—Marvelously productive. Large size, dark red.

Wilder

Maloney's Favorite Collections

FOR GARDEN PLANTING, SPECIAL BARGAIN PRICE, \$2.50 EACH

HERE are Collections chosen by experts who have selected the best and most popular assortments for the average home. One or two of these collections in your rear garden will improve the appearance of the property. And you never know the highest satisfaction of fruit until you eat it fresh-picked, fully ripe, and out of your own yard. All varieties here offered are easy to raise, bear liberally and grow more valuable year by year.

Dwarf Apple Trees

DWARF fruit trees require less space, bear larger fruit and several years earlier than standard trees. There are even more important points. The low, broad heads are within reach, so that the fruit can be easily picked. Dwarf trees should be planted fifteen feet apart. Some varieties will bear the first year, all will the second, and bear a full crop the fourth year.

New Introduction FRUITING AGE TREES

OWING to increasing demand from our customers for a tree for backyard planting, which will fruit in two years, we are this spring introducing a tree which will meet this demand. The bearing-age tree: By this we mean trees which have been once transplanted and scientifically treated; the big value of these trees lies in the fact that they will fruit in two years. Maloney's have cared for them until they have developed into just the kind of tree for your backyard or small home orchard. A great many people make the very serious mistake of selecting small trees for their garden planting when for a small additional investment, they can enjoy the wonderful Bearing-Age Tree. From the fact that these trees have once been transplanted, they are equipped with a beautiful root system which enables them to become established quickly. Before planting be careful to have your soil loose and mellow.

Just read the planting directions on this page and see how easy it will be for you to set your Bearing-Age Trees.

Planting Instructions

Cut off about six inches of the limb growth, prune off bruised ends of roots, if any, make a smooth cut, dig hole deep enough so that the tree will be buried to the same depth as when standing in the nursery row, or up to the collar—soak roots in the water one-half hour, place trees in hole, fill in one-fourth, tread well; another one-fourth, tread well, the third one-fourth, tread well; then finish filling and tread firmly so that when the tree is set it would require a strong man to pull it out.

Summer Varieties

***Early McIntosh**—The size of the fruit is about that of McIntosh and it is similar to and quite the equal of McIntosh in flavor. The trees are vigorous, hardy, healthy, productive, and bear annually.

***Red Astrachan**—Tree hardy and regular bearer, a very vigorous grower; fruit large, roundish, nearly covered with deep crimson, overspread with a thick bloom; juicy, rich and beautiful. This fruit commands the best price of the summer varieties. July and Aug.

Sweet Bough—Large, pale yellow; sweet, tender and juicy. Compact grower and abundant bearer. August.

***Williams Early Red**—Medium sized; dark red, sometimes yellow splashed; flesh is crisp, tender, juicy and sub-acid. Ready for market when people are hungry for new apples; brings top price. August.

***Yellow Transparent**—Medium size, roundish, oblate, slightly conical; skin pale yellow when matured; flesh tender, juicy, sprightly, sub-acid; good. August.

McIntosh

Autumn Varieties

***Duchess of Oldenburg**—Medium size; red striped; flesh white, juicy and excellent flavor. Trees are natural dwarf growers, make fine fillers; require small root and branch space. Crops nearly always large. Tree among the hardiest and one of the few that will stand cold locations. August and September.

Fall Pippin—Very large, yellow, tender, juicy and rich. Fine in all localities; tree vigorous. September and October.

***Gravenstein**—An attractive and excellent quality apple. Fruit large and uniform in size, skin thin, tender, greenish yellow, overlaid with dark red. September to November.

Maiden's Blush—Large, flat; pale yellow, with red cheek; beautiful; tender and pleasant. September and October.

***Red Gravenstein**—This red sport is more attractive than Gravenstein. It differs from the old Gravenstein only in the solid, dark, red colored fruits. An excellent fall apple.

Winter Varieties

***Baldwin**—Due to its dependability, desirable season, good size, attractive color and good quality, every orchard in the Baldwin belt should have at least a few trees of this grand "old reliable" variety. Large strong, vigorous trees, producing an abundance of large to very large apples of a bright red color, with yellowish, crisp, tender, very juicy flesh. Very good in quality. November to April.

***Ben Davis**—Fruit is medium to large. Bright red or red striped with clear yellow. It succeeds wherever apples are grown. January to June.

***Cortland**—A fine apple resulting from the cross pollinization of McIntosh and Ben Davis. Inheriting only the good qualities of each, the new apple has found additional good qualities of its own which makes it in demand. The Cortland is a beautiful red apple, larger than the McIntosh, of better quality and matures a month later. Keeps late in winter and can be handled and shipped like the hardiest of other market varieties. November to February.

***Delicious**—No variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red. Flesh fine grained, crisp and melting, juicy with a delightful aroma, of very highest quality. A splendid keeper and shipper. Tree one of the hardiest. November to April.

Amherst, Mass.
Oct. 6, 1930.

To whom it may concern:

I have examined for trueness to name all the standard apple stock now growing in the nurseries of Maloney Bros. Nursery Company and all trees as they stand in the nursery row are, to the best of my knowledge and belief true to name.

J. K. SHAW, Research Professor of Pomology.

Fameuse—Medium size; deep crimson; flesh snowy white, melting and delicious. October to December.

Gano—Fruit of deep, dark red that brings a ready sale in market. December to March.

Gilliflower—Known as Sheep Nose. Tree a good vigorous grower and a reliable cropper. October to February.

Golden Russet—Medium size, clear golden russet, with slight flush; juicy, high flavored. November to April.

***Grimes Golden**—Medium to large size; skin golden yellow, sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. December to April.

Hendrick Sweet—An attractive red winter apple. Excellent in quality for dessert or for other culinary uses. November to April.

***Jonathan**—A beautiful red apple, highly flavored. Tree long lived, productive, and an early bearer. November to January.

***King**—Flesh yellow, crisp, tender, juicy and sub-acid. Skin fine yellow, mottled with orange red, splashed with carmine. October to January.

Mammoth Black Twig—Dark red. December to April.

***McIntosh Red**—An exceedingly valuable, hardy, attractive apple; good size; nearly covered with red. Flesh white, fine, very tender, juicy and refreshing. Tree hardy, vigorous, a good annual bearer—comes into fruiting early, yielding large crops. Do not overlook McIntosh when selecting varieties for commercial and orchard planting. It has no superior as an early winter apple. October to February.

Milton—An apple of the McIntosh type, coming in season after Early McIntosh and preceding McIntosh by a month or six weeks. The fruit is most attractive in color and has the characteristic McIntosh taste and aroma. Late Summer.

Newtown Pippin—Medium to large; yellow, delicious flavor, a long keeper. November to May.

***Northwestern Greening**—A round, large, attractive, greenish yellow apple; flesh fine grained, juicy, firm, good quality. October to April.

***Northern Spy**—A hardy, large, red, winter apple. Flesh juicy, rich, crisp, tender, aromatic, of good flavor. Tree very healthy, strong grower, rugged. Blossoms very late, escaping frosts. December to March.

Opalescent—Fruit large; pale yellow, nearly and frequently covered with dark red; mildly sub-acid. November to February.

Rambo—Medium, red and yellow. Mild flavor. Excellent old variety. October to December.

***Red Spy**—A solid, bright red Spy, without stripes or splashes. It has been recommended to fruit growers by the N. Y. State Fruit Testing Co-operative Association at Geneva as a new variety worthy of trial. December to March.

***Rhode Island Greening**—Large. Flesh yellowish, firm, fine grained, crisp, tender, juicy, slightly sub-acid, very good. Skin grass green to yellow, sometimes with brownish-red blush. Tree large, strong, vigorous, wide spreading. Keeps until April. Ripens in December.

***Rome Beauty**—Large, round, mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points. December to March.

Smokehouse—Color yellow or greenish, mottled with rather dark red, sometimes deepening to a solid bright red. October to March.

Stark—Large, striped, mild, sub-acid, good. Valuable as a keeper. January to May.

***Stayman's Winesap**—Medium to large, attractive; green and yellow, almost hidden by dark red stripes; flesh yellow; bears young, often producing a barrel to a tree when five years old. Bears every year. December to April.

Delicious

Sweet Delicious—The apples are large and attractive in size, color and shape with the sweet aromatic flavor of Delicious. The variety is an apple for home use where it will be chiefly appreciated for dessert and baking. Color deep yellow lightly covered with solid dark red; flesh yellow, firm, tender, juicy, sweet. Season November to January.

Tolman Sweet—Medium size; color, light yellow; flesh white, firm, rich and very sweet. November to April.

Twenty Ounce—Very large, yellow striped red, fine quality apple; good keeper. October to January.

***Wagener**—Fruit large, tender, firm and juicy. Bright pinkish red, striped with carmine. Tree vigorous and hardy. December to May.

***Wealthy**—Fruit large, roundish, skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; particularly valuable for cold climates. Planted as a filler in many sections. October to January.

***Winter Banana**—Fruit large size, perfect in form, golden yellow, and beautifully shaded and marbled with bright crimson red; flesh lemon-yellow, fine grained. November to January.

Wolf River—Fruit large, flattened, conical, highly colored. September to December.

York Imperial—The fruit is of medium size, skin yellow and almost wholly covered with two shades of red. November to February.

Hyslop Crab—Fruit deep crimson. October.

Whitney—Most popular of the large crabapples; bears early, productive; fruit large; skin light yellow shaded and striped with red; flesh yellowish, crisp, juicy, sub-acid or nearly sweet. Late August to September.

McIntosh Red a Big Money Maker

THOUGH newer varieties have appeared since its introduction the McIntosh continually grows in favor. This is due to its many superior qualities.

Fruit is hardy, attractive, of good size; the rich red color covers almost the entire fruit.

McIntosh quality is of the highest; both flavor and aroma are delicious.

McIntosh flesh is white, fine, tender, juicy and stimulating.

McIntosh bears early—the third and fourth year after planting, netting a profit the fifth year.

McIntosh apples are large and uniform in size and shape—very few culls.

McIntosh is not only an early bearer but an annual bearer, creating profits each and every year.

STATEMENT OF CERTIFICATION, OCT. 6, 1930

TO FRUIT GROWERS:

Several thousand one and two-year-old apple trees were certified as true to name during the summer of 1930, by this Association for Maloney Bros. Nursery Company of Dansville, New York. This certification was in charge of Dr. J. K. Shaw of the Massachusetts Experiment Station, our agent for certification.

A printed label is attached to each and every certified tree bearing the name of the variety and our stamp of certification as being true to name.

Trees of the varieties starred were certified in 1930 for Maloney Bros. Nursery Company of Dansville.

RATES—Less than ten at each rate. Ten to fifty at ten rate. Fifty or more at hundred rate.

PARCEL POST—First-class, 3 foot Pear Trees sent by parcel post, postage prepaid, for 35c each; 10 for \$3.00.

SOIL—Pears will succeed in a clay soil, although any good heavy soil will do, but avoid planting on sandy loam.

Bartlett—Large, coloring when fully ripe to waxen yellow, with red blush; juicy, melting, highly flavored, a most delicious fruit; tree bears early and abundantly. We have sold many large orchards of this variety. The fruit ripens just at a time when there is but little competition; in fact, there is no pear ripening at the same time that is in the Bartlett class. September.

Beurre d'Anjou—The pears are of large size, green in color, but often yellowing when thoroughly ripe. For late fall and very early winter use. It keeps until January with special care. October to November.

Beurre Bosc—A large and beautiful russet pear, very distinct, with a long neck. Without a doubt the highest quality and best flavored of all. Flesh fine grained, juicy and melting, very delicious and highly flavored; bears well. October.

Beurre Clairgeau—Large; light yellow, shaded with crimson and russet. Flesh yellowish, melting. Early abundant bearer. November to January.

Clapp's Favorite—A superb, large, long, yellow pear, richly flushed with russet-red next the sun. The flesh is fine grained, juicy, melting and buttery. Earlier than Bartlett. Early August.

Duchess d'Angouleme—A most dependable cropper. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. Profitable market pear. October and November.

Flemish Beauty—Considered one of the hardiest and best for the Northwest, in which location it bears great crops of perfect fruit. September and October.

Garber—Tree upright; fruit large; skin yellow with crimson cheek; flesh similar to Kieffer. October.

Gorham (Late Bartlett)—Originated by New York State Exp. Sta.

Kieffer—Large, rich golden yellow, sometimes tinted red on the sun exposed side; fair quality. To properly ripen should remain on the trees until leaves begin to fall, then gather carefully and allow to ripen in a cool, dark cellar. One of the most resistant to blight.

Koonce—Tree vigorous, upright grower; fruit medium size; skin greenish yellow; flesh white, juicy. August.

Lawrence—Medium to large, golden yellow, with melting, aromatic flesh. Unsurpassed as an early winter pear. November and December.

Bartlett

Seckel—A beautiful and delicious little pear that is the standard of excellence in its class. One of the richest and highest flavored pears known. Owing to its extreme hardness it can be planted in cold climates with the assurance of best results. September and October.

Sheldon—A large, round, russet and red pear of very fine quality, melting, rich and delicious. October.

Wilder—A very early pear of excellent quality. Medium to large size, irregular, bell-shaped; pale yellow, with shadings of russet-red. Early August.

Winter Nelis—The finest winter variety produced. Tree very hardy and a heavy cropper. Fruit of medium size and roundish, yellow in color, covered with russet. The flesh is yellow, sweet and fine grained. Unexcelled for quality when fully ripe. December.

Sweet and Sour Cherries on Mazzard roots 10c each higher.

Montmorency

Sweet Cherries

Bing—This valuable black cherry succeeds everywhere. Flesh very solid, flavor of the highest quality, a fine shipping and market variety. July.

Black Tartarian—This fine old variety produces immense crops of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth. Late June and early July.

Governor Wood—One of the best cherries; very large, light yellow, marbled with red; juicy, rich, and delicious; tree healthy and a great bearer; hangs well on the trees; vigorous. Last of June.

Lambert—One of the largest cherries; dark purple red, turning almost jet black when ripe. Flesh firm, rich, juicy, tree rugged, strong grower and an enormous bearer. Late July.

Napoleon—Tree medium size, erect, with roundish head, fruit borne generally in twos, very large, oblong cordate, light lemon yellow with red cheeks. Flesh very hard, brittle, colorless, reddish at the stone. Good, excellent bearer. Late June.

Schmidt's Bigarreau—Fruit very large size, deep mahogany color. Flesh is dark, tender, very juicy, fine, rich flavor. Fruit grows in clusters. An excellent shipper and brings good money on the market. July.

Seneca—Ripens the first week of June; fruit large, skin thin, tender, adherent to the pulp; color dark red to purplish black, indistinctly mottled; flesh dark red to purplish red, tender, sweet, with a spicy flavor. Introduction of New York State Agricultural Experimental Station.

Windsor—A splendid, large, liver-colored cherry; hangs a long time and rots but little. Flesh remarkably firm and good, the tree is very hardy and fruitful. Exceedingly valuable for late market and home use. July.

Yellow Spanish—Large, pale yellow, with red cheek; firm, juicy and excellent; one of the best light colored cherries; vigorous and productive. Last of June.

Bing

Sour Cherries

Dyehouse—A hardy and valuable cherry. The earliest cherry of fine quality. Often bears at two years old, and has the appearance of being covered with a purple cloth, such is the abundance of the fruit. Has the smallest pit of any cherry known. For tarts, pies and especially for canning it has no superior among cherries. Early June.

Early Richmond—This hardy cherry fruits on young trees soon after planting. Yields marvelous crops. Tree slender in growth, with a roundish, spreading head. Fruit is medium size, round and dark red. Flesh tender, juicy, and sub-acid. Ripens in June.

English Morello—Easily grown, generally producing a heavy crop. Fruit dark red, quality good; rich, acid flavor; late. Hardy for extremely cold latitudes. August.

Montmorency—The best sour cherry. There is a greater demand on the market for this cherry than for any other. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearers of all sour cherries. Montmorency is a good shipper, very attractive looking and always brings good prices. The canning factories favor it. Fruit is good sized, fine flavored and bright, clear red. Flesh is of fine quality and sub-acid. Fruit ripens ten days after Early Richmond.

1930 Price \$3.80

1931 Bargain Price \$1.90

Grape Vines

PRICE, TWO YEAR, NO. 1, STRONG VINES,
EXCEPT WHERE OTHERWISE NOTED—
20C EACH; 10 FOR \$1.75; 100 FOR \$14.00

PARCEL POST—Grapes can be sent by parcel post, postage prepaid for 5c per vine extra.

EVERY city and country garden should have grape vines. They occupy little room and supply an abundance of the most healthful fruit. Plant about 8 feet apart, and in rows, and the rows proper 8 feet apart.

Caco (Red)—This new red grape has a most delicious flavor, and is of the highest quality. It is one of the earliest grapes in ripening.

50 cents each; 10 for \$4.50

Catawba—Dark red when fully ripe. Bunch large, berries medium to large, skin thick, flesh somewhat pulpy, best for wine.

Concord (Black)—Early. Decidedly the most popular grape in America and deservedly so. Bunch large, shouldered, compact; berries large, covered with a rich bloom; skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet, pulpy, tender; vine a strong grower, very hardy, healthy and productive. For general cultivation the most reliable and profitable.

15 cents each; 10 for \$1.35; 100 for \$9.00

Campbell's Early Black—Bunch and berry very large; sweet and juicy. Stands at the head of early black grapes for quality.

Delaware (Red)—Bunches small, compact, shouldered; berries rather small, round, skin thin, flesh very juicy, sweet, spicy and delicious.

Lucile (Bright Red)—It is very hardy and vigorous. Bunches and berries medium to large. This variety is a very good shipper.

Moore's Early Black—Bunch large, berry large, round with heavy bloom.

Niagara (White)—Bunch and berries large, greenish white, changing to yellow when fully ripe.

Portland—New white grape. Developed by the New York State Experiment Station. Very early, hardy and productive. Large berries and compact clusters.

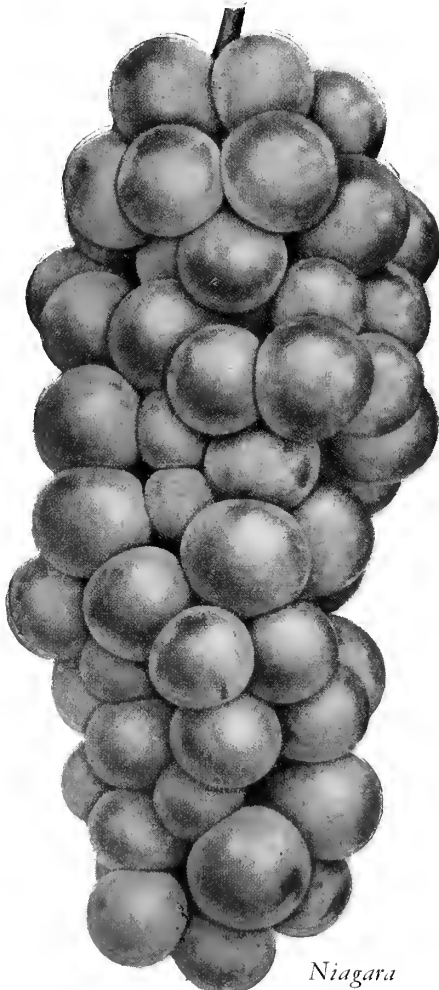

65c each; 10 for \$5.50.

Wyoming (Red Grape)—Bunches medium size, well formed; berries amber-colored, medium size; more productive than Delaware which it somewhat resembles, but not so good in quality.

Worden (Black)—Bunch large, sometimes shouldered, compact, berries very large, skin thin.

Concord

Niagara

Care of Grape Vines

TRIM the first seasons growth back one-half; following year train two or three vigorous canes to stakes. It is essential that grape vines are trimmed annually.

It is also a good practice to cut back the strong canes that break from the main stem to 3 or 4 buds.

RATES—Less than ten at each rate. Ten to fifty at ten rate. Fifty or more at hundred rate.

PARCEL POST—First-class 2 ft. small size trees sent parcel post, postage prepaid, for 30c each; 10 for \$2.50.

Belle of Georgia—Very large, white, with red cheek. Flesh is white, firm and of fine flavor. Tree rapid grower and productive. Free. August.

Carman—Fruit large, color creamy white or pale yellow, with deep blush; flesh tender, fine flavor; very hardy and productive. Early August. Free.

Chair's Choice—Large, yellow, free, flesh very firm, ripens after Smock; great bearer. October. Free.

Champion—Fruit large, flavor delicious, skin creamy white, with red cheek; valuable for commercial orchards, extremely hardy. Late August. Free.

Crawford's Late—Fruit large; skin yellow, or greenish yellow, with dull red cheek; flesh yellow; tree vigorous, moderately productive. Late September. Free.

Crawford's Early—A magnificent large yellow peach, good quality. Tree very productive. Its size, beauty and productiveness make it one of the most popular sorts. Early September. Free.

Crosby—Medium size; bright orange yellow streaked with carmine. First of September. Free.

Early Elberta—Differs from the Elberta in ripening, being ten days earlier, rounder and of better quality. Early September. Free.

Eclipse—Dark red, yellow-fleshed. Fruit oval, flesh fine grained, excellent shipper. Recommended as a variety to replace Hiley.

Elberta—The leader of all peaches and the greatest commercial variety on the market; 50 per cent of the peaches planted are Elberta. In all probability no peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can

be grown. A beautiful peach of good quality, not only the best orchard variety, but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore a more uniform cropper. It is large, yellow, with red cheek, juicy and high flavor; flesh yellow. Season medium early, following quick upon Early Crawford. Early September. Free.

Fitzgerald—One of the hardiest in bloom and tree; very prolific, large size. First of September. Free.

Greensboro—Color greenish-white, shaded and splashed with dark red; very hardy. Owing to extreme hardness of both tree and bud we recommend it for sections where other varieties do not succeed. Late July. Free.

Heath Cling—Fruit very large. Skin creamy white, having a faint tinge of red on sunny side. Is unequalled by any other clingstone. Middle of September.

J. H. Hale—Fruit large and highly colored. It averages one-third to one-half larger than Elberta; ripens about five days earlier and is much superior in flavor. Color, a deep golden yellow, with carmine blush. An excellent shipper and should be in every garden or orchard. Late August. Free.

Kalamazoo—Large, golden yellow, with crimson cheek; flesh thick, yellow, superb quality, small pit. Strong grower, early bearer, hardy and productive. First of September. Free.

Mountain Rose—Large red, white flesh, juicy and excellent. Early August. Free.

Rochester—Is in a class by itself because it is the only good sized, yellow, freestone peach ready for market in the middle of August in the Northern states. The fruit is large, yellow, with a most attractive red blush; juicy and delicious; keeps well. Free.

Salway—Large, roundish, ovate, yellow, with a crimson cheek; flesh deep yellow, red at the pit; sweet, juicy, good. Valued as one of the best late peaches for market. October. Free.

Slappey—Medium-sized, yellow fleshed; good quality. Late August. Free.

Smock Free (Beer's Smock)—Fruit large; oval; skin orange yellow, mottled with red; a good market sort. Last of September.

South Haven—Mid-season, large, yellow freestone, heavy bearer.

Yellow St. John—Medium size, orange yellow, with red blush; flesh tender, juicy and quality very good. Middle of August. Free.

Quinces

Meech's Prolific—Fruit large, orange yellow. October.

Orange—Fruit large, golden yellow, of fine quality. It rarely fails to produce a crop. Ripens in October.

Apricots (Plum Roots)

Royal—Hardy and abundant bearer; yellow, with red cheek; large; slightly acid, rich and luscious. July.

Moorpark—One of the largest. Orange-red cheek; firm, juicy, with a rich flavor; productive. August.

PLUMS are hardy and grow vigorously in nearly all sections, succeeding on any soil that grows good corn or potatoes. Plant 15 to 18 feet apart each way.

European Varieties

Bradshaw—Very large, early, dark violet red, juicy and good. Very productive; valuable for market. Tree very hardy and vigorous. Middle of August.

Diamond—Large, beautifully colored blue, well formed plum. Late August.

Fellenburg Prune—A fine prune, oval; purple, flesh juicy and delicious. Early September.

German Prune—Medium; oval; purple or blue; juicy, rich, fine. Tree vigorous and very productive. One of the best. Sells for higher prices in market on account of high quality. A leading favorite. There is no easier grown fruit that gives greater or more certain profit than the German Prune. Owing to its keeping qualities it is highly prized for shipping. September.

Grand Duke—One of the best late plums for market, as large as Bradshaw, of same color. Last of September.

Imperial Gage—Rather large, oval, greenish. Flesh juicy, rich and delicious. Middle of August.

Lombard—Handsome reddish plum, the flesh yellow, juicy and pleasant. An excellent variety and can be relied on for a crop when other varieties fail. August.

Monarch—Fruit very large, roundish oval, dark purplish blue, perfect freestone. October.

Moore's Arctic—Fruit grown in clusters. Color dark blue or nearly black when fully ripe. September.

Reine Claude—Large, pale yellow, marked with red, excellent and of fine quality; good bearer. Middle of September.

Shipper's Pride—Large, nearly round; dark purple, quite juicy, sweet. September.

Shropshire Damson—Fruit oval; tree a good grower and enormously productive; fruit of medium size produced in thick clusters or groups, dark purple color, esteemed for preserving. October.

Yellow Egg—Golden yellow, covered with thick bloom. Flesh golden yellow. Rather juicy. Tree large, very productive. September.

York State Prune—Large size, color dark blue, covered with purple. Delicious. One of the largest, best in quality, and most productive of all prunes. Tree is a vigorous grower and hardy. Best for commercial purposes. Last of August.

Japanese Varieties

Abundance—Tree a rapid grower, healthy, comes into bearing remarkably young, yields abundantly. Fruit of medium size, amber, with markings of red; juicy, sweet, of good quality. August.

Burbank—Is decidedly the best of Japan varieties, unsurpassed for beauty and productiveness, as well as a very hardy tree. Succeeds over a wide range of country, will stand the most severe winters. Fruit large, oval, with reddish purple skin; flesh yellow, juicy, and good. August.

Lombard Plums

Red June—The great early market plum. Medium to large; deep vermilion red, with beautiful bloom; very showy; flesh light lemon-yellow, firm, slightly sub-acid, delightful. Early August.

Wickson—Largest of the Japan plums. The color is bright cherry-red, covered with a light bloom; the pit is small for so large a fruit, the flesh is thick, sweet, tender and rather dry, indicating good keeping and shipping qualities. September.

Mastodon Strawberries

Choice Strawberries

PRICE, POSTPAID; 25 FOR \$1.00; 100 FOR \$2.50; 1000 FOR \$15.00

*For garden culture set plants in rows two feet apart,
with plants one foot apart in the rows.*

Big Joe (Perfect)—Late. Fruit is firm and of large size, has a good flavor, no green tips, wonderfully productive; plants are strong growers, thrives on any soil that will produce strawberries.

Cooper—Fruit very large, productive, and of good quality. Cooper produces its crop early in the season, and the flavor of the fruit is delicious. It is grown successfully in all soils and climates that will produce strawberries.

Howard 17 (Perfect)—Early to late. Noted for its long fruiting season. Ripens with the early varieties and continues fruiting until late varieties come in. It is adapted to all sections of the country. No weakness of any kind. Fruit large to very large and holds its size well through ripening season. Foliage smooth, bright and clean.

New York (Perfect)—Mid-season. Plants are large and healthy. Fruit extremely large, well colored. We doubt if there is a better mid-season variety for the Northern states.

Premier—Perfect flowered. It is of smooth, evenly conical form, and large; its color the commanding glossy red which sells on sight, aided artistically by the calyx or cap which remains green after picking. Quality unsurpassed, production greatest of all earlies; plant growth vigorous, healthy and strongly reproductive.

Fall or Everbearing Strawberries

Mastodon—The fruit is of very large size and has a good waxy appearance. Plants are large and healthy, foliage deep, glossy, dark green. Produces an abundance of fruit continuing throughout the summer and fall.....25 for \$1.50; 100 for \$4.00

Progressive—A wonderful fall-bearing strawberry. The spring-set plants not only produce a big crop of berries the same season, but the runner plants begin to bear fruit as soon as set, and quite often you will find a runner plant full of blossoms and berries before it has made any roots.....25 for \$1.25; 100 for \$3.50

Rhubarb

Champagne Rhubarb (New)—Excels all in size, flavor and delicate tenderness of its crimson stalks. Strong, 2 year roots.

15 cents each; 10 for \$1.25; 50 for \$7.50

PARCEL POST—Rhubarb can be sent parcel post, postpaid for 3c per bush extra.

Asparagus

Price—2 year, strong plants.

25 for 75 cents; 100 for \$2.00; 1000 for \$12.50

PARCEL POST—Asparagus can be sent parcel post, postpaid, for 1/2c per bush extra.

Palmetto—A very early variety, even regular size and of excellent quality.

Conover's Colossal—Very large, makes rapid growth; planted mostly by market gardeners; very productive.

Washington (Pedigreed)—A new rust resistant variety. Stalks are large, dark green, with a heavy purple overtone.

Sage

Holt's Mammoth—Plants of strong growth. Price of strong, 2 year roots.35 cents each; 10 for \$2.75

Sage can be sent parcel post, postpaid for 3c per root extra.

Horse Radish

Hardy roots. Plant in deep, rich soil.

10 for 40 cents; 100 for \$3.00.

Horse Radish can be sent parcel post, postpaid, for 1/2c per root extra.

Washington Asparagus

Rhubarb

Terms: Cash with order is expected. On orders over \$10.00 we will ship C.O.D. providing twenty-five per cent of the total amount is sent with order. If the order goes by express you pay the balance to your Express Agent upon delivery of stock; if by freight, you pay the balance at your bank where you will find bill of lading, which you will present to your freight agent, who will deliver shipment to you. On C.O.D. freight shipments, kindly advise name of your bank.

How to Remit: By personal check, express money order, post office money order, bank draft or cash in a registered letter.

Transportation: All goods sold F.O.B. Dansville, N. Y.

Size of Orders: On order of less than \$2.50, please add 25 cents extra to cover packing cost. As it costs us just as much to pack and prepare small orders as it does large ones, we find it necessary to ask you to add 25 cents extra on all orders less than \$2.50. This does not mean that these orders will be shipped prepaid.

Use Order Blank: Use one of our order blanks, enclosed whenever possible. Write name and address plainly and be sure to state in each order, when, where and how you want the shipment sent.

Order Early: Order during January, February or March if possible. We ship as received; first come, first served. We must treat all our customers alike and cannot ship orders received in April ahead of those received in January. It is not uncommon to have an early spring when everyone wants their order at once, so Order Early.

Rates: Less than ten at each rate; ten to fifty at ten rate; fifty or more at hundred rate.

Satisfaction Guaranteed: We guarantee all stock sold by us to be strong, vigorous and healthy and to arrive in good condition. If for any reason you are not absolutely satisfied with your stock notify us at once and we will gladly replace the items or refund purchase price. The successful growth of a tree or plant is dependent upon so many conditions over which the nurseryman has no control, such as the planting, cultivation and maintenance, the weather, soil, rainfall, etc. that we cannot guarantee successful growth.

Claims—If there are any claims, they must be made on receipt of goods when any errors of ours will be promptly and satisfactorily adjusted.

Inspection: Our nurseries are inspected yearly by a duly authorized state inspector and a copy of our certificate received from the Department of Agriculture and Markets, Albany, N. Y. accompanies each shipment.

Shipping Season: In the spring our shipping season usually opens about the 20th of March and continues through May and forepart of June, weather permitting. In the fall about 15th of October through November, weather permitting.

Planting Instructions—Helpful planting and after care instructions are listed in this catalog. Follow carefully and preserve this book for future reference.

Maloney's Trees are True-to-Name—No human caution could be more exacting than ours. If any trees prove untrue to name, upon proper proof we will replace or refund the purchase price.

10% Discount for Cash with Order, if mailed on or before March 25th, 1931; 5% Discount after that date.
